## Hockey Raiders Open Schedule Next Wednesday in Brampton

At a league meeting in Brampton last Thursday, three new teams were added to the Senior "B" hockey group, bringing the total of teams to eight. With the five teams from last season ready to go, plus Orillia, Meaford and Elmira, this promises to be one of the fastest Senior "B" groups in the province. Of the three teams added, Orillia is the only one the Raiders have never met, but they are not strangers in Milton. Last season it took the Milton team eight games to eliminate them in a very tough series. Meaford eliminated the Raiders last year and Elmira spent several seasons in this group a few years ago.

A twenty-eight game schedule is being drawn up by Pat Patterson of Brampton, the league convenor. The Raiders open in Brampton next Wednesday, Nov. 14, with the home opener on Friday, Nov. 16th. The Stouffville Clippers are the opposition that night. The rest of the schedule will be printed next week. The Raiders, with two weeks' practice under their belts, have two exhibition games this week with the Welland Combines, a Senior "B" outfit. They travel to Welland for the second game on Friday night. This should serve to get them in top notch shape for their league opener the following week.

With all of last season's players to choose from, plus several newcomers, the Raiders should have a strong club. Fred Kentner from Acton is out with the Raiders, after spending the last couple of seasons in Scotland. Several of last year's Juniors are also out. While attendance has picked up the last two seasons it is hoped that this year will be even better. With three new teams, and most of the home games on Friday nights, the Raiders are hoping for a banner year at the gate.

## Police Warn Again Check Air Rifles

Police chief Roy Haley has asked that it again be brought to the attention of both juveniles and parents of the improper use of air rifles within the town limits. Many residents are ignorant of the fact that no youth under 16 years of age should possess the pellet firing weapons. The chief stated that it is also illegal to discharge any air rifle or pistol in town and any person of any age caught doing this will have the weapon seized by the police.

Items for the Herald Social and Personal column are always welcomed.

## Hallowe'en Mostly Fun In Town, No Damage

Anyone driving along Georgetown streets on the night of Wednesday, October 31st, saw some highly irregular goings on as local youth concentrated on the 'trick' half of the traditional trick or treat slogan, leaving the younger, costumed set to monopolize the taffy apple field.

Although no serious damage was reported, a number of signs were taken from various sections of town and transplanted where their effect could be better appreciated by the younger population. "No parking" signs were posted in the middle of private drives; free advertising for the opposition was plastered all over stores in the business section, and at the high school revengful students sneaked under posted guards to erect a large wooden "for sale" sign on the front lawn.

In the park district garbage cans were emptied and placed over mail boxes, and tree branches dragged across the road to form temporary road blocks. Small cars were ca-

## Eccles Barn Landmark Is Destroyed by Fire

One of the old landmarks on the 10th line was destroyed by fire on Hallowe'en night. Two barns on the farm presently owned by Eccles and John McClure were destroyed by fire late in the night. The fire, of unknown origin, had almost completely burned down the barns before it was discovered in the hay log which enveloped it. Fortunately the animals were not in the barns, nor any feed but a quantity of machinery was lost. The farm, formerly owned by Archie Eccles, and now owned by the McClure brothers has been in the family for one hundred and thirteen years and the McClure brothers are the fourth generation to farm here. The late James Eccles settled on the land when he first came from Ireland.

## BAN STORM DRAINAGE INTO SEWER SYSTEM

Roof drainage into sanitary sewers is creating problems in some sections of town and the town engineer has been asked by council to advise residents that this cannot be allowed.

One such request caused John Bell, general manager of Smith and Stone to interview council on Monday. Mr. Bell explained that such drainage from the company's King Street plant had been directed into the sewer several years ago at the request of the town superintendent. At that time the extra water was needed in the sewers, but with more building on King Street it now causes trouble in the system.

Council agreed with Mr. Bell that it is a town responsibility and decided to make a sewer extension estimated to cost \$700 to overcome the problem.

Suggesting that action be taken to speed construction of the new Harrison school, John Kreppi, 23 Shelley Street was told by the mayor that he should contact the school board with any suggestions as council has no direction over school matters.

The public school board asked temporary extra lights at the Wrigglesworth school crossing, explaining that in December when pupils are crossing the highway at 5 p.m. there will be a darkness hazard.

The planning board informed council that they could not recommend a change from industrial to commercial for the Petrafina highway property as the company has requested.

Two more strings of coloured

lights were ordered for Main Street Christmas decorating, and at Deputy Reeve Sargent's suggestion, the town engineer was asked to submit a sketch and cost for ornamental lighting for the municipal building for the holiday season.

Extra street lights will be placed on Ewing Street, Windsor Road and Chapel Street E. after a study of these streets by the light committee.

## Second Georgetowner Featured on "Graphic"

For the second time in a very few months Georgetowner TV viewers had a particular interest in the Friday evening TV program "Graphic." Last Friday Dr. Charles H. Best and Mrs. Best were interviewed in their home in Toronto.

The first was when he and Dr. Banting tried their serum successfully on animals and the second when it was tried on a diabetic patient successfully. He spoke of his sons, one of whom is well known in this district, Sandy, who makes his home on the family farm "Greenock", and who is a professor of botany at the University of Toronto. Dr. Best's way of relaxing is painting, and some of his pictures were shown on the program. Television viewers are fortunate to have these intimate glimpses into the home-life of people who have made our lives safer and happier.

Contract for an 8-room addition to Georgetown High School has been awarded to the local McNally Construction firm.

The \$138,000 McNally tender was lowest of four received by North Halton high school district board which accepted it at a special meeting called in Georgetown Monday night.

It was the second time the board had asked tenders. Last spring tenders received were not made public, after it was found they exceeded estimates so much that the board could not proceed with further plans. Revised plans were prepared by the architects, J. B. Parkin Associates, and second tenders called.

The two-storey, eightroom addition will join the old school building at the rear, and forms part of a composite plan by which the original building will some day be replaced by a complete new one. It is expected it will be ready for occupancy when school begins next September.
