PRESENTATION TO PIANIST

At the Legion W.A. Hallows' party, Mrs. Mary Morrow was presented with a cup of saucer in appreciation of her fine work in playing the piano.

The party was held a week ago Monday in the Legion auditorium and featured games, contest prizes and dancing.

Aluminum helped today's high-speed, high-compression car engine get that way. Aluminum pistons brought not only toughness but lightness to this up-and-down job. Less weight meant less inertia and so made possible higher engine revolutions. It brought heat conductivity, too — so your engine doesn't overheat when you drive fast and far.

It started in the twenties—and today every car produced in North America is equipped with aluminum pistons. And much of the aluminum comes from Canadian smelters. To match the needs of the automotive, aircraft, construction and many other industries for large quantities of aluminum, Alcan is again stepping up its already enormous smelting capacity.
