

"TIME DISCLOSETH ALL THINGS"
(author's name below)

The past ten years have revealed the answers to formerly unsolvable medical problems. We now have conquered killers that have plagued mankind through the ages.

Soon, within our time we hope, all diseases will be overcome. The devoted efforts of research chemists and physicians, backed up by the millions of dollars supplied by the pharmaceutical industry are perfecting new drugs.

As rapidly as these new medical aids are developed it is our willing duty to immediately have them available for your need.

YOUR PHYSICIAN CAN PHONE TRIANGLE 7-3692 WHEN YOU NEED A MEDICINE

Pick up your prescription if shopping near us, or let us deliver promptly without extra charge. A great many people entrust us with their prescriptions. May we compound yours?

Glen Williams - TR. 7-3502

Pretty Claudette Laporte of the CNR wishes Mr. and Mrs. J. Albert Barker, Weston, a French-Canadian "Bon voyage" as they leave on the 1958 Ontario Goodwill Crop Tour to Quebec. Over 100 farmers and their wives from all parts of Ontario are making the two-week trip, sponsored by the Ontario Soil and Crop Improvement Association. The Barkers have taken all five annual tours, each of which have covered a different region of Canada.

FARM NEWS

BRUCELLOSIS TEST ALMOST COMPLETED
J. E. W.

Blood testing under the Brucellosis Control area programme in Halton is almost completed, states Dr. Twiss of the Health of Animals branch at Brampton. The last report which will include all herds tested up until about the middle of July, reveals that only 92 cattle out of a total of 19,850 in 906 herds have reacted to the test. The 92 head which reacted were in 49 herds.

On the basis of total cattle population the percentage reactors works out at slightly less than

one-half of one percent, which qualifies the county to be designated a Brucellosis Certified area. However, to be recognized as a certified area the percentage of infected herds must in addition not exceed 5 per cent of the total number of herds, and on the first test approximately 6 per cent of Halton's herds were affected.

Present reports would indicate that by the time the thirty day rest on the infected herds is completed, Halton should without difficulty qualify as a Brucellosis Certified Area.

The calving vaccination programme has certainly paid off and Halton cattle owners may well be proud of the high health status of their cattle.

Halton Weed Inspector

RAGWEED POLLEN INDEX
For many years medical authorities have recognized pollen from "Ragweed" as No. 1 enemy for people afflicted with "Hay Fever." The steady increase of cases of this unpleasant allergy in the last fifteen years created a demand for authentic data on "Ragweed pollen" distribution throughout the United States and Canada.

The Pollen Survey Committee of the American Academy of Allergy now supply the data known as "The Ragweed Pollen Index" with the Hamilton, Oakville and Toronto area being within the survey.

The index figure for each community is based on three factors which directly affect individual pollen exposure: length of season, maximum aerial concentration of pollen, and total pollen catch on test slides throughout the season. Any city or community having an index above 10 is not recommended, between 5 and 10 is fairly good, below 5 is considered good and below 1 excellent.

Dr. L. A. Clarke, M.O.H. for the City of Hamilton, recently reported in the Hamilton Spectator, the "Ragweed Pollen Index" as 68.5 making that city one of the worst Hay Fever centres in Canada. Dr. Clarke also pointed out that there are an estimated 100,000 Hay Fever sufferers in Eastern Canada alone and made a special appeal to everyone in the area to "Destroy Ragweed Now."

Halton County is situated very close to Hamilton and it seems reasonable to assume we are affected by much of the same "Pollen Count." The season of pollen distribution in this area is the months of August, September and October at least until a heavy frost occurs.

Ragweed is an annual weed, easily killed with 2, 4-D during the growing season. Cutting will give a reasonable amount of control so far as pollen is concerned and where huge plants appear in backyards, etc., hand pulling is a very practical and worthwhile method of control. So let's do our part in trying to reduce the high ragweed pollen index.

St. Alban's Anglican Church, Glen Williams, was decorated with standards of pink and white gladioli and pink carnations on Friday, July 18th when Eva Agnes Garvin, daughter of Mr. and Mrs. Lorne Garvin, Glen Williams, became the bride of Leonard Charles Murdock, son of Mr. and Mrs. Andrew Murdock, Milton.

Rev. John Rathbone officiated at the double ring ceremony which took place in the evening at seven o'clock. Mrs. J. R. Williams was the organist and Miss Donna McMillan, cousin of the bride was the soloist who sang Perfect Love during the signing of the register.

The bride, given in marriage by her father, chose a gown of white Chantilly lace over taffeta, ballerina length, fashioned with a sweetheart neckline. Her fingertip veil fell from a pearl studded headress. The wedding bouquet was of pink sweetheart roses, white stephanotis and pinocchio poms.

Lorraine Garvin was maid of honour for her sister and Mrs. Daphy Hewitt was bridesmaid. Both were gowned alike in blue nylon over taffeta with feather hats and mittens to match and they carried frenched blue and white carnation corsages.

Stan Murdock acted as groomsmen for his brother and the ushers were John Doherty, a friend of the groom, and George Sargent, uncle of the bride.

The bride's mother received for her at the reception held in the parish hall, Glen Williams, in an orange ice, sheath with white accessories and a corsage of bronze roses and white stephanotis. The groom's mother assisted in a blue silk gown with white accessories and a white and pink carnation corsage.

For travelling to different parts of the United States and Rochester the bride chose a blue and white sheath with white accessories and a white carnation corsage. Mr. and Mrs. Murdock will make their home in Glen Williams.

The bride is an employee of Smith & Stone Limited office staff and the groom a member of the Georgetown Dairy staff.

Guests were present from Edmononton, Detroit, Toronto, Dundas, Bradford, Acton, Erin, Milton, Norval, Inglewood, Georgetown and Glen Williams.
