Laking-Brinklow Marriage Solemnized At Eden Mills.

Ruth Helen Brinklow became the bride of William Emerson Laking in a wedding ceremony in Eden Mills Presbyterian Church on July 16th. Rev. Douglas Black of Port Dover performed the ceremony amid tall standards of white gladioli and ferns.

The bride is the daughter of Mr. and Mrs. Claude Walter Brinklow of R. R. 1, Campbellville. The groom is the son of Mr. and Mrs. Robert John Laking, of R. R. 1, Moffat.

Mrs. Emerson Anderson of Acton was soloist. She sang "As Dawns the Day" and "Wedding Prayer," accompanied by Miss Margaret Early of R. R. 1, Campbellville.

Given in marriage by her father, the bride wore a gown styled along princess lines, with fitted bodice and floor length bouffant skirt. The white lace bodice featured a high scalloped neckline and long lace lily point sleeves. The skirt of white net was enhanced with panels of lace in the front and back, and a slight train. Her fingertip veil of bridal illusion, bordered with Chantilly lace, was held by a lace headress trimmed with seed pearls and she carried a bouquet of red roses and white carnations.

Mrs. Jack Chamberlain of Eden Mills attended the bride as matron of honour. She wore a light blue nylon chiffon over taffeta gown, featuring a scoop neckline and full, floor length skirt with floating panels at the back. Her picture hat and gloves matched her gown and she carried a bouquet of red roses and white carnations. Jack Laking, brother of the groom, of Moffat, attended as best man. Ushers were LAC Alan

Report Only Minor Damage District Holiday Crashes

Damage was estimated at close to \$300 when a car driven by Ronald Kelly of 44 Kennedy Rd., Brampton, was involved in an accident Saturday north of Glen Williams.

The car left the travelled portion of the road and cracked a hydro pole opposite the ninth line farm of Roy Tizzard at about 7.15 p.m. There were no injuries in the crash which was investigated by Sgt. Dave Hardy of the county detachment OPP.

Crs. Hardy was also summoned to the scene of a minor accident, on No. 7 Highway, Sunday, when cars driven by Alexander Arsenau, 153 Parliament St., Toronto, and Mrs. Clare Burns, R. R. 1, Georgetown, collided resulting in approximately \$75 damage to each vehicle. The accident occurred about a mile north of McCullough's corners at about 1.30 Sunday afternoon.

A Georgetown resident, Jacob Van Der Voort, of 25 John St. W., and George Chapman, 6 Anne St., Guelph, escaped uninjured when their cars sideswiped on No. 7 Highway near Silvercreek late Monday night. Cst. Bennett of the county detachment OPP investigated and placed damage at \$160. This one was reported at 11.25 a.m.

Hometown Firm Awarded Brampton Sewer Tender

Brampton's new sewage treatment plant will be built by a hometown construction firm, Andeen Construction Company, it has been announced by the Ontario Water Resources Commission. The Andeen Company's bid was low at \$324,973.

It is estimated the plant which will be of the activated sludge type, will be completed by August, 1959. It will have a capacity of one million gallons per day.

At the same time the contract for the installation of trunk sanitary sewers along the valley of the main branch of the Etobicoke River, from the treatment plant to the town line, was awarded by the Commission to the Robinson Contracting Company of Hamilton, with the lowest bid of \$374,000.

The sewage treatment plant, to be located at the Second Line East in Toronto Township, southeast of Brampton, will have its outfall to the Etobicoke River. Construction of the plant will involve the laying of an 8-inch watermain from Kennedy Road to the plant.

It is interesting to note that the prices submitted by the successful contractors were below the original estimates of the cost of both plant and sewers, about \$300,000 lower.

Construction of these needed works is being undertaken under agreement between the Town of Brampton and the Ontario Water Resources Commission. The latter body contracted to arrange for all construction and financing with Brampton agreeing to pay the Commission over a period of 30 years with interest at a nominal rate. Proctor and Redfern of Toronto are the consulting engineers.

No debentures have to be sold by any municipality which enters into a contract with the Commission to build sewage or water works. The Commission finances the work through construction and when the works are ready for operation the value of the asset is recorded and is charged back to the municipality over an extended period of years — 30 is the most favoured, by means of a sinking fund. Each annual payment made by the municipality to the Commission is invested and the interest accumulating on this investment is credited to such a debt retirement account.

The rate of interest paid by municipalities is not fixed but is based on the Commission's total borrowing each year. This mass borrowing by the Commission with the backing of the Ontario Government tends to obtain lower interest rates for the benefit of municipalities involved in OWRC projects.

At the end of the period of agreement between the municipality and the Commission, when the sinking fund with its accumulated interest has amounted to the debt outstanding, the works can be, at the option of either party, returned to the municipality.

In connection with the building of Brampton's new sewage treatment plant, it is interesting to note that the Commission is most active in the area at present. It is building a \$336,000 treatment plant at Streetsville which will soon be in operation, and that Georgetown and Orangeville are presently negotiating agreement for similar plants. Georgetown, \$800,000, including a trunk sewer, and Orangeville, \$128,000. In addition Orangeville is entering into an agreement with the Commission to build a water works at an estimated cost of \$62,000. All three municipalities are situated on the Credit River.

When the three plants are in operation much will have been accomplished in the cleaning up of the streams in the area.

The Commission's province-wide activities in helping various municipalities with their water and sewage problems are expanding rapidly. Construction projects in this connection now total around \$24 million.

FARM NEWS

OFFER SILVER TROPHY BEST JUNIOR PLOWMAN

Saturday, September 6th, will see the Junior plowboys and girls in action at the farm of Spencer Wilson, near Hornby. The primary purpose of this Match is to provide coaching for interested young people. To this end an invitation has been extended to Winfred Timbers, veteran plowman and judge of York County to act as the official coach and judge. However, some excellent cash awards are jointly provided for all contestants by the Halton Junior Farmers' Association and the Halton Plowmen's Association. In addition, we have just learned that the Milton Milling Co. will donate a silver tray to the champion plow boy or girl of the day.

For further details and a copy of the prize list, our readers should contact the Agricultural Office, in Milton.

ZINNIA, ASTERS PRODUCE ODD MIXTURES OF COLOUR

Reg Williams, Stewarttown reports two garden oddities. One of his asters produced a pink and white bloom on the same stem, while a zinnia plant had one red and one yellow flower on one stem.

...so both are building up bank accounts

Nowadays, practically everybody has a bank account. Last year alone, forward-looking Canadians opened 450,000 new deposit accounts in the chartered banks—almost as many as the increase in population. The owners of today's 11 million accounts know a bank is the safe, convenient, pleasant place to build up funds for every need and purpose. They know, too, that in a chartered bank you deal with skilled, friendly people, ready to help with all your banking.

THE CHARTERED BANKS SERVING YOUR COMMUNITY

icipalities with their water and sewage problems are expanding rapidly. Construction projects in this connection now total around \$24 million.
