A STEP TOWARD HEALTH Remember the first time visited your chiropractor? If you were like most people, you were quite neryous and very much in the dark about the methods he used to get results. You knew he didn't give out pills or prescriptions. Perhaps you had heard the word adjustment, and associated it with some kind of massage or "mauling." Very soon, however, you learned two basic things about adjustments; they cause no discomfort and they lead to

better health. The chiropractic spinal adjustment is a unique method of restoring to norwal work ing order any vertebrae that have been displaced. These vertebrae are small sed ments of your spinal col umn. Displacements these segments, known as

"subluxations" are an am portant factor in discase In correcting spinal day placement the chiropractor pu's the patient on a spic ially constructed table which through spring move arran gements and incenious pad dings, give the patient maximum comfort and relaxation There is nothing in common between massage and ad justment. An adjustment is a momentary thrust performed with the hands which the small bony projections of the vertebrae as People of all ages can take adjustments . . from infants to octogenar-Patients invariably feel more relaxed and comfortable when they get off the chiropractor's table.

Usually some form of benefit can be noted from the very first adjustment. The number of spinal adjust ments necessary to correct a condition of disease naturally varies with several factors; the age of the patient, his general condition, the nature and stage of the disease and the effect of previous treatment....
