FEATURING TWO BANDS

Jack Train and His Manhattan Orchestra

from Toronto and the

Midneters Rock 'n' Roll Band

Note change of date for Mustache Growing Contest to November 21st

BAPTIST CLUB SPREADS SUNSHINE AT MANOR

A number of women residents of the Manor are indebted to Mrs. Louis Keene, R. R. No. 1, Campbellville, for two delightful afternoons recently. On Thursday afternoon, October 16th, Mrs. Keene took five ladies on a motor trip to Eden Mills. The foliage of the trees was at its best that day and the trip was greatly enjoyed. On Thursday, October 23rd, Mrs. Keene took four more ladies on a motor trip which was followed by afternoon tea at the home of Mrs. K. Robinson. The kindness of Mrs. Keene and Mrs. Robinson is greatly appreciated.

Also greatly appreciated was a supply of attractive tasty apples donated to the residents by the Cubs and Boy Scouts of Milton after

their recent "Apple Day." It was a pleasure to welcome back to the Manor for the Sunday afternoon church service on October 19th, Rev. D. A. Powell, the rector of Grace Anglican Church, Milton. Mr. Powell was accompanied by Mrs. Ray Waters who came to play the piano for the hymns. Mr. Powell based his instructive sermon on part of the sixth chapter of St. Matthew, pointing out that Jesus made many references to the Kingdom of God. Mr. Powell asked the question "What did Jesus mean by the Kingdom of God?" He explained the difference between the political kingdom, free of the yoke of Rome, that His disciples desired and the kingdom of the

brotherhood of Man that Christ meant. Five tables of euchre were in play at the meeting of the euchre club on Monday evening, October 20th. Ten ladies and ten men attended. Even after sunset on Tuesday, October 21st, sunshine lingered in the dining room of the Manor when the ladies of the Sunshine Club of First Baptist Church, in Georgetown, presented a very enjoyable concert for the residents. The president of the club, Miss Norma Thompson, presided at the concert and in her opening remarks expressed the pleasure felt by the members of the Club in coming to present this, the fifth program that the Club has presented for the residents. On this occasion the residents had the pleasure of welcoming to the Manor for the first time, Mrs. L. Whan, wife of the new minister of First

Baptist Church, Georgetown. The first number on the program was a fine duet, "Softly and Tenderly" sung by Mrs. Buttrey and Mrs. B. Corbett, accompanied by Miss Norma Thompson at the piano. The devotional period, which came next, was conducted in very reverent and inspiring fashion by Mrs. A. Robson. Mrs. W. Mulder played "The Lost Chord" as a piano solo with beautiful expression. Two hymns were sung by the visitors and residents in unison. Mr. Don Hancock showed a number of very striking coloured slides depicting the beauty of Nature in the four seasons of the year. Mrs. Don Hancock brought the program to a close with a lovely and appropriate vocal solo, "A Perfect Day." After a speech of thanks by Muriel Thompson, Miss Norma Thompson promised another visit by her club in the near future. Refreshments of tea

and cookies were then enjoyed. Before leaving for home, the visitors presented a generous treat of homemade candy to the residents. The entire evening was very much in accord with the name of the Club, the Sunshine Club, and this sunshine was enjoyed and appreciated very much. Rev. L. Graham, minister of St. Paul's United Church, Milton, came to the Manor on Sunday afternoon, October 26th, to conduct the church service in the chapel. Mr. Graham himself played the piano accompaniments for the hymns. Mr. Graham delivered a scholarly and informative sermon on the Early Christian Barnabas. By assembling various portions of information from the Book of Acts, Mr. Graham presented a word picture of Barnabas and showed what a worthy person he was. Among the fine traits of Barnabas were his generosity, his open-hearted acceptance of the Apostle Paul, his lack of prejudice, his humility and his willingness to be an evangelist and a missionary. These are traits of character that could well be emulated by the laymen and laywomen of the Christian Church today.

JAMES PATTERSON WAS NORVAL RESIDENT
Rev. G. L. Royal officiated at the funeral service of James Beverley Patterson on Wednesday, October 22nd in the Lee and Kaiser Funeral Home, Streetsville. Mr. Patterson, the son of Elmer Patterson and Georgina South Patterson of Norval who survive him, died at the age of forty-six in New Toronto where he had been for many years. Mrs. Jack Evans, Streetsville, a sister, also survives. Pallbearers were W. Graham, W. South, Graydon Chester, Noel Patterson, Don South and Elwood Henry. Interment was in Norval Cemetery.

WEED CONTROL NEWS
by V. E. McArthur
Halton Weed Inspector

YELLOW ROCKET
PRIMARY NOXIOUS WEED
"Yellow Rocket" is a weed that is spreading rapidly in the Province of Ontario, according to the Field Crops Branch of the Ontario Dept. of Agriculture. While this is not the season when it is noticeable, nevertheless all too many of its bright yellow flowers were in evidence early last Spring in many parts of Halton County. It belongs to the mustard family and when it was first noticed here, only a few years ago, Rocket was not considered very serious, however, those farmers who have acquired this unwelcome weed are having their troubles to eradicate it. If Yellow Rocket is to be controlled successfully, every precaution must be taken. It first came to many of our farmers in Clover Seed. This year, it has been classed as a primary noxious weed under the Canada Seeds Act, which now ensures that not even one Yellow Rocket seed may be present in No. 1 Grade Clover Seed. Farmers using only No. 1 Grade seed are now protected.

Control
Single plants and small patches should be pulled and burned. Early cutting of hay and grass silage will keep it from seeding. In hay and pasture fields where only grasses are present Yellow Rocket can easily be killed by spraying with 8 oz. of 2, 4-D acid per acre, early in the growing season.
Late Fall Application of MCP
Eradication of Yellow Rocket with 2, 4-D presents a problem in sod fields containing Clovers as the required application of 2, 4-D will seriously damage the clover crop. The Dept. of Agriculture have this year recommended a late fall application of 6 oz. of MCP Amine in at least 20 gallons of water per acre. Good results may be secured if the spray is applied after two killing frosts and when the daytime temperature is above 45 degrees F. An experiment using two new chemicals is being planned for a Halton county farm this Fall.

Modern Lighting for Modern Living

Today, lighting plays a new role in modern living. Coloured bulbs, new fixtures and controls all make it easy to add pleasure and beauty to our homes... to create an atmosphere of warmth, spaciousness, and hospitality. Housework and hobbies are so much easier and safer if the lighting in your house is the proper intensity for good vision. Inside and out, modern lighting protects your home from prowlers, protects your family from accidents. At Christmas you can share the festivity and enjoyment with your neighbours with colourful Christmas lighting. Modern lighting is a silent partner, helping you to see better, enjoy new comfort, new convenience... helping you to "Live Better Electrically"—the safe, clean, modern way.
