HEAVY SNOWFALL

Monday's heavy snowfall meant another all-night job for the men who keep Georgetown's streets clear.

Residents woke on Tuesday to find main arteries clear again, and much of the snow removed from the downtown district.

farm homes have been burnt with able insurance company's agent consultant if you experience any Christ United Church, Clarkson, loss of life in one case and close would be glad to explain in detail on February 10th. In spite of dan calls in others. Often when a farm the fine print of your policy to gerous road conditions, over one house is on fire the occupants only you. Policies should be brought hundred registered before hunch, have time to get out and have to up to date every year. with more arrivals for the after flee to a neighbor's to phone the fire department. If the neighbour is on the same rural line it is

quite often not possible to reach the operator because the wires in have fused. This give the same effect on the operator's board as someone using the line and because there is a steady light on her board she has no way of knowing that you are trying to reach her. If this happens, it is necessary to drive to another telephone

line to phone the fire department. On rural lines if you are forced to vacate your house because of fire, pull down the telephone lines on the outside of the house before going to the neighbour to call the fire department. If the wires are cut back to the point where they are not fused it will leave the line open and in operation.

Do you and every member in your family know the telephone number of the fire department? Remember, when a fire occurs i is easy to panic. All members of the family should know the number and it should be placed right on the phone. Also remember when talking to the fire departmen to take time to give them a clear description of the location of your property and how to get there. They can't help you very much if they can't find your place

Every farm should have a good strong ladder that will reach the , top story of the house. Quite often the stairway is filled with fire and prevents anyone from going upstairs to rescue children when thye could be safely and easily taken from the house by means of a ladder. This, of course, means a ladder in excellent repair and strong enough to hold two people This could easily mean the difference between life and death for

you got one? Almost every year we add more appliances to our farm wiring. In buildings that have been wired for some time it is easy to reach the safe load limit. This should be checked frequently. The Ontaro Hydro will do this for a very

nominal charge. Heat lamps offer a great many advantages around the barn but unless well installed offer a severe fire hazard. Remember, they will set straw on fire if they come in contact with it. Heat lamps should be of the pyrex type that will not break if splashed with water. They should be installed in a porcelain receptacle rather than a metal one. The lamps should be covered with a shield which if knocked, down will upset and point the lamp

Do not suspend the lamps by

Discuss Education at Home & School Panel

Traffic safety, study habits and parent-teacher relationships were some of the subjects discussed by a panel at a meeting of Glen Williams Home & School association last Tuesday in the school.

Rev. Alex Calder acted as panel moderator and those participating were Rev. Lloyd Freel, who is minister of the United Church in the village, Alex Dobson, a teacher at Georgetown High School, Ted Scott of the town police force and Herald editor Walter Biehn.

Association vice president Desmond Earl conducted a business meeting, a highlight of which was presentation of a prize to Karen Korzack, whose essay on weed control won second prize in Esquesng township. County weed inspector-Vern McArthur was present to present the award. Principal Ralph McKeown announced that a school paper will be issued soon, with proceeds going to the Junior Red Cross. In a game of name bingo, Mrs. John Rathbone was winner. Tea and cookies were served afterwards.

D. GAY, D.C. KIDNEY DISORDERS

Kidney disorder symptoms are often so slight they are hardly poticed. Early signs such as fatigue and listlessness are often passed off by those suffering as "being out of sorts." Dull head aches, puffiness under the eyes and poor appetite are more advanced clues while vision disturbances and a rise in blood pressure are real danger signs.

Simply explained, the kidney's main job is excretion of the wastes from the body. Through its miles and miles of minute filter chambers. some hundreds of quarts of blood are pumped daily. From this tremendous amount of blood, a delicately balanced mechanism accurately arranges to excrete the correct amount of waste acid, alkali, and water. A malfunctioning kidney for example, would allow the body to absorb too much water resulting in water-logging of tissues (dropsy.) Or, in the reverse, dehydration results. Other conditions too numerous to mention may result when diseased kidneys upset the balance in acid or alkali

It is a lengthy subject far from completely covered here. Often abused by bad living habits, kidneys are also affected by nerve impulses distributed from the central portion of the spinal

Chiropractors know that good health is a combination of good living habits, posture and food. Neglect these and the pressure of daily living can lead to trouble. The observant person at the first sign of trouble, consults a chiropractor to find out if spinal adjustments are needed for continued good health.

An Important Message

To Ontario Farm People.

A FARM ACCIDENT **SURVEY**

will be conducted throughout Ontario from March 1st, 1959 to February 29th, 1960

This survey will record all farm accidents and fires during the year and seek to determine their causes. The objective of this survey is to provide the basis of a Farm Safety Program designed for your benefit.

The Farm Accident Survey, in the County of Halton

Is under the direction of your Agricultural Representative J. A. Francis, assisted by Halton District Women's Institutes

An accident reporter will collect details of all accidents for each community in your County. The success of a farm safety program will depend on the full cooperation and assistance of all Ontario farm people in this survey.

ONTARIO DEPT. OF AGRICULTURE
