

D. GAY, D.C.

ASK A CHIROPRACTOR

If you want to know if Chiropractic can help your condition, ask a Chiroprac-

Only one who has studied and practiced Chiropractic is competent to give an intelligent and scientific opinion on Chiropractic, or say what it can or cannot do. (It is not sufficient to be told by someone "Chiropractic is all right for some conditions, but not yours.")

The detailed diagnostic training of a Doctor of Chiropractic not only enables him to recognize conditions which can be helped by Chiropractic care, but also to recognize those which require other forms of treatment. Because the Doctor of Chiropractic is interested in the greatest good for the patient, he will refer non-Chiropractic cases to ather competent specialists in the various branches af the healing field.

Health depends directly upon the harmonious interrelationships of all parts of the body. Normal functioning, co-ordination and integration of bodily activities is controlled and is dependent on the master system.

. . the nervous system . . an arrangement of nerve cells and fibres so extensive that it is linked with every tissue and organ. Interference with the transmission of nerve_impulses causes poor health.

JOB MAKERS

CANADIAN manufacturing in each month of 1958 provided employment for an average of 1,146,156 Cánadian men and women. This represented nearly 43 per cent of all

non-agricultural employment in Canada.

The combined income of those engaged in manufacturing in 1958 was slightly less than \$5 billion or about 31 per cent of all Canadian wages, salaries and supplementary" labor income.

Manufacturing is by far the most important part of the Canadian economy.

Manufacturing provides the greatest amount of employment in Canada. It makes by far the largest contribution to government revenues. Its production enables Canadians to enjoy the second highest standard of living in the world.

Because of its contribution to our way of life, Canadian manufacturing deserves the support of every Canadian

Steel is the foundation of all our manufacturing, and Stelco is Canada's largest steel producer.
