PALERMO AND MILTON  
WIN SOFTBALL AT HALTON  
JUNIOR FARMER FIELD DAY

The Halton Junior Farmers' Association held its annual Field Day at Hornby, on Saturday, May 16th. Although the weather was not ideally suited for such an event, the Junior Farmers were able to select teams to represent the County at the Provincial Field Day to be held in late June at the Ontario Agricultural College.

Palermo Junior Farmers were the winners of the Boys' Softball event. The Milton Junior Institute were winners in the Girls' Softball tournament. A Tug of War was awarded to the Milton Junior Farmers, with Palermo Juniors winners of the Horse Shoe Pitching Competition.

**BLUEPRINTS FOR GROWTH** at the University of Toronto are studied by the University's president, Dr. C. T. Bissell, centre, shown in front of new women's residence at Victoria College. With him in hard hats are Neil J. McKinnon, right, president of the Canadian Bank of Commerce, and M. Wallace McCutcheon, vice president and managing director of the Argus Corporation, joint-chairmen of national drive to raise \$12,600,000 from public. The five year university expansion, costing \$52 million, will provide minimum facilities for the additional 10,000 students, now in Ontario's public and secondary schools, who will seek entrance to the university in the next few years. Present enrolment is 14,000.

**TIPS  
FOR HOME BUYERS**

(This is the first in a series of weekly articles entitled "How to Buy a Home and How to Take Care of It", provided by the National House Builders Association and its local affiliate, the North Halton Builders Association, as a public service to help you find the right home for you and your family, and to show you how to get the maximum satisfaction from it.)

**"SHOULD I BUY A NEW HOME NOW?"**

The desire to own one's own home is natural. It's based on more than mere sentiment. Besides the pride of ownership which comes with possession of real property, other tangible benefits accrue to the home owner. For a home means increased comfort, healthier, happier surroundings for the entire family, and added economic security for the present as well as the future.

The decision to buy is the result of weighing the pros and cons of rental living on one hand with home ownership on the other. Rented quarters carry less financial responsibility, but also mean a compromise in family comfort with nothing but a collection of rent receipts to show after a lifetime of occupancy.

While the purchase of a home usually represents the largest single financial obligation a family undertakes, it brings the rewards of ever-increasing equity in a property which has been selected specifically to meet the needs of family living. This is not only a bulwark against the threats of recession and inflation but, after the mortgage is paid up, constitutes rent-free housing with expenses only for taxes and maintenance — and in most cases a property which is worth much more than its original cost.

**Consider-Own Position**

Before making a decision, however, you should consider your own particular circumstances. Is there a chance you will be moving from your present community within a year or so? If so, the house you purchase should be chosen with a view to easy resale. It should be in a price range, have facilities, and be in a location which will be attractive to as many as possible of your potential future buyers. You should examine available statistics on the movement of second-hand homes in your community to help you make your decision. You should discuss the matter with experts — your builder, your banker or your local Central Mortgage & Housing Corporation officials, and estimate what equity you will have in your new home at the time you may be obliged to sell.

These investigations will help you decide whether or not your particular circumstances make it advisable for you to buy rather than rent at present.

If you have no plans for moving from town in the very near future, however, chances are you: best financial proposition would be to purchase a new home.

**Property Values on Rise**

Once the decision to buy a home has been made, the next question which arises in the mind of the potential buyer is "when should I buy?" In a sense, the best time to buy a home would have been last year, five years ago, or almost any time during the last 20 years. Because those who made careful purchases then have found that their homes have steadily increased in value. Cash tends to lose value during periods of national economic stress, while real estate rises in value during the same period.

Is this a good time to shop for a new home of your own? The experts reply with a resounding "yes" to this question. For one thing,

competition between builders has never been as keen and this spells a better buy for the house hunter. There is, too, a wide selection of types of houses from which to choose. Sturdy, attractive new materials and equipment have gone into them.

Manufacturers as well as builders, have focussed on designs to make life easier for the housewife and pleasanter for the whole family. New new house designs vary as widely as individual needs and tastes.

Land values in most areas are rising, they doubtless will be higher in 1960 than they are today. This means that every penny spent on a home today is money well-invested.

**Quality Best in History**

The quality of building materials today is the best in history. Basic materials, such as lumber and concrete, are plentiful. They are stronger and more durable, the result of industry wide research to produce better homes.

Great progress has been made, too, in technical construction through constant research, field testing and experimentation in building materials. Improved equipment and finishing — in heating, plumbing, painting and wiring, have added beauty and comfort, as well as value, to new houses.

Some people may want only to dream of acquiring a house of their own. But those who really want to do something to make that dream come true would do well to join in the great weekend sport of exploring the 1959 houses in their communities. As in everything else, the best guide is seeing for yourself.

Your first step should be to consult a home builder who builds the style of home you desire. In selecting a builder, you may wish to consult home owners in your community or contact the North Halton Builders Association.

Your builder can furnish valuable advice in helping you plan your home and arrange for financing. The satisfaction in being able to call a little strip of this globe your very own is hard to beat!

FARM NEWS

**WHITE GRUBS CAN BE A PROBLEM!**

During the past week there have been reports of flights of June beetles. It is expected that this year in Halton we will have a large flight of adult beetles in May and June. There was considerable damage in this area in 1957, and so damage can be expected from White Grubs in July, August, and September of next year, 1960.

The best time to treat, is when the beetles are active this May or June.

White Grubs, the larvae of June beetles, very often cause a great deal of damage to plants by eating the roots and other underground parts. The beetles this year will fly in huge numbers, taking to the air at dusk and feeding and mating on the foliage of trees and shrubs.

At the first sign of daylight they will seek out grassy areas, weedy places and uncultivated land, and burrow into the soil, where the females will lay their eggs. The eggs will hatch in a few weeks, and the young grub will feed on decaying vegetable matter and the roots of living plants. In the fall they go deep into the soil, and remain there during the winter.

In the spring of 1960, when the soil warms up, they will come up to within a few inches of the surface, and feed ravenously during the whole growing season on the roots of plants. This is when they do the greatest amount of damage in the life cycle.

In the fall they will go down again in the soil, and pass the winter, coming up again in the spring of 1961. At that time the grubs will feed only for a few weeks, before pupating and changing to beetles. These beetles however will remain in the soil until spring of 1962. The cycle will then be completed. Heavy flights will

again take place, and a new-generation will be started.

While it is possible to find all stages in any one year, the majority of insects in most sections of Halton will follow this pattern.

In controlling the White Grub, land which is under cultivation during the beetle flights in 1959, will not offer suitable egg laying places. However, where cultivation is not feasible, such as in lawns, parks, and pastures, and where insecticides are not applied directly to the soil, it is possible that heavy infestations may build up, and severe injury may occur during the summer of 1960. For best results insecticides should be applied during the beetle flight this year.

Applications made directly to the soil now, will have the two-fold effect — they will kill the tiny grub as soon as they hatch out; and will also kill a great many adults which will be in the soil.

If, however, no treatment is made at this time, and grubs are found to be present or suspected of being present in the spring of 1960, insecticides should be applied in the early part of May next year.

There are 4 insecticides recommended for controlling White Grub: Aldrin, Chlordane, Dieldrin, and Heptachlor.

**JULY FLOWER SHOW IS HORTICULTURISTS' PLAN**

At a public meeting of the Georgetown Horticultural Society last Wednesday evening in Wrigglesworth school, Mr. E. F. Sutter, field officer of the Credit Valley Conservation Authority, explained plans which are underway for the development of the Terra Cotta Conservation area, for recreational purposes.

This is one of three such areas being developed to serve the northern, central, and southern parts of the valley. Being only a short drive from Georgetown, the area is easily accessible, and could become a very popular and beautiful playground for the people of north Halton. Establishment of recreational areas is of course only one of the many conservation aims of the Authority, but it has a special appeal to all who enjoy seeing such expanses of natural beauty preserved and made available to all who can appreciate them.

As a summer project, the Society announced plans for a flower show, to be held in July. Door prizes of bedding plants donated through the kindness of Mr. H. Koelslag, Glen Williams, were drawn for Ernest Ball, Mrs. H. Woodcroft and Mrs. Norman Devoreaux.

ONTARIO

SEALED TENDERS addressed to the undersigned and endorsed Tenders for the Supply of Coal, Coke, Fuel Oil and Propane Gas for the Federal Buildings throughout the Province of Ontario will be received in the office of the secretary until 3 p.m. (EST) on

**THURSDAY, JUNE 18th, 1959**

Forms of tender with specifications can be obtained from the Chief of Purchasing and Stores, Garland Building, Ottawa, Ont.; the District Manager, Dominion Public Building, London, Ont.; and the District Manager, Post Office Building, Fort William, Ontario.

Tenders must be made on the printed forms supplied by the Department and in accordance with the conditions set forth therein.

The lowest or any tender not necessarily accepted.

**ATOMS BRING A WIN  
IN SOCCER OPENING**

Georgetown teams won and lost over the week-end as the Oakville and district soccer leagues got underway Saturday afternoon.

The success story came from the younger club the Atoms who opened their season by blanking Hopevale at Braemar 2-0. The little team adopted the short passing game to completely outplay their opponents and displayed surprising teamwork for their experience.

The sportsmanship of the young team on and off the field also drew compliments from the on-lookers. They take on Oakville Trafalgar in their next game scheduled for the first week in June. The Bantams, meanwhile were taking a thumping from a powerful Mimico Beach team who despite the superb goal tending of Buddy Lauppe ran up a 6 to 1 score against the locals here. Like the other teams in the league Mimico has been together as a playing unit for two to three years whereas the Georgetown squad is just starting to mesh.

Lauppe was brilliant in a losing cause and was easily the standout on either team.

Mayor Jack Armstrong officially launched the outdoor season at the park with a pre-game kickoff and the coaches said promising to mould a team that would be a credit to the town before the season is over. The teams took the high scoring loss in stride and are confident that it will be a different outcome next time they clash with the Mimicos.

The plans for a three team little league made up of local teams are underway and should be finalized within the next two weeks. A cup for the league champs will also be put up for grabs by the Community Centre.

The Bantams test their wings again at Cooksville next week when they take on South Peak.
