wait until the night watchman came around, about 11 p.m. Scared the daylight out of him.

Oh, I have a few other skills, too, that are not to be sneezed at. In prison camp I picked up some fancy culinary tricks, and can still turn out as nice a batch of turnip jam or prune punch as you'll come across. During a year in hospital, I learned enough crafts to set myself up in a souvenir shop anytime. To mention only a couple: I learned to knit, and ground out baby's soakers like a machine for a few weeks; I learned leatherwork, and my wife still has a vast five-sided receptacle, which I told her was a purse, and in which she keeps old golfballs, to prove it.

The more I think of it, by George, the cheerier I get. Why there are hundreds of things I can do. I haven't even begun to touch on some of the more delicate skills I've acquired. Like hearing spelling lessons, shooting a fair game of pool, pulling on kids' rubber boots, making a good pot of chile, and reading a book while shaving.

I'm certainly glad I had this little chat with myself tonight. I was a little depressed here for a while, but never again will I worry about being out of a job. It shouldn't be any trick at all to pick up a position where they want a man who is not just one of those narrow specialists, but who is pretty darn expert at several hundred things. How many men are there around, for example, who can name the wives of Henry VIII, play a kettledrum, and fire four fifty-millimeter cannon with their eyes shut?
