

MRS. SARAH BOYD OF TOWN is shown here surrounded by her family on the occasion of her eightieth birthday. Recently, included in the picture are Eva (Mrs. Floyd Downs), of Hornby, Bessie (Mrs. DeForest of Milton), Elsie (Mrs. Walter McGilvray of Qumville), Lloyd Boyd, and Miss Vera Boyd, also of town.

Hass-Mino Wedding Vows In St. George's Anglican

St. George's Anglican church was decorated with white snapdragons and tallisman carnations Saturday, April 27th for the wedding of Linda Joyce Mino, daughter of Mr. and Mrs. Willard Mino, 15 McNaught St. to Fraser Edward Hass, son of Mr. and Mrs. Gustaf Hass, 110 Prince Charles Drive.

Rev. Kenneth Richardson officiated at the double ring ceremony and the organist was George Dekker.

Given in marriage by her father, the bride wore a full length gown of white organza and Gimpure lace. The bodice was fashioned with a pointed basque and the Sabrina neckline was edged with lace medallions forming a V shaped back. The short lightly puffed sleeves were edged with lace motif and bows, and the very bouffant skirt featured folded bands of organza in the back, offset with how knots above the Chapel train. The fingertip veil fell from a crown of pearls.

The maid of honour, Diane Hill, a cousin of the bride, and the bridesmaid Janice Mino the bride's sister were gowned alike in street length dresses of orange brocaded taffeta fashioned on princess lines with matching jackets and headbands, and white accessories. They carried colonial bouquets of tallisman roses, white carnations and hydrangeas.

Wayne Hass a brother of the groom was groomsmen and Carl Hill, a cousin of the bride, and Ed Hass, another brother, were ushers. The groom's father was unable to attend because of illness.

At a reception following the wedding at the Jack O'Lantern restaurant, the bride's mother received in a beige linen dress with lace bodice with beige accessories and a carnation of

Plans Completed for 1960 Pasture Development Program

J. A. F.

Johnston Neelands president of the Halton Soil and Crop Improvement Association, has announced that final arrangements have been made for the Halton Pasture Development program sponsored by the Association.

This program will include as one of the main features, the Halton Pasture Management competition. The Association has sponsored this program for the past three years, to promote improved pasture management practices on livestock farms in Halton county.

In addition to the prize money awarded by the Halton Soil and Crop Improvement Assn., the Halton Cooperative Supplies will award a Watch to the winner to the competition.

It cannot be overemphasized that every one in this competition is a winner. At least twice a season his pasture program is checked, and suggestions given for improvement. Some suggestions or criticisms can be acted on promptly and the pasture score and production improved. Others may result in longer range planning for improvement. In any case the judge's visits afford the contestant an opportunity to obtain impartial and constructive judgment and suggestions. All pasture fields on the farm are scored in June and August, except pastures used exclusively for young cattle supplementary pasture such as oats and hay, or silage aftermath pasture. Actually the supplementary and aftermath pastures are taken into consideration when calculating carrying capacity.

The basic objective of the competition is to promote a better understanding and appreciation of the value of good pasture and good pasture judgment.

The judge for Halton's competition this year will be Mr. J. Norman Bird, of Georgetown. Mr. Bird was the judge for previous competitions.

In addition to prize money allotted in the Halton competition, the winners are eligible to take part in zone and provincial competitions. The province will be divided into zones and the county winners in each zone will be judged in September, by judges appointed by the Ontario Dept. of Agriculture to select zone winners.

Trust Company Accountant Receives Proficiency Award

C. D. Cantlon, C.A., accountant for the Halton and Peel Trust and Savings Company, has received an award from the Trust Companies Association of Canada for having received the highest mark of any student in the subject of Trust Business 1.

This is a three year course on the various aspects of trust company business under the direction and supervision of Queen's University.

Mr. Cantlon lives in Burlington and is an accountant at the head office of the company in Oakville.

Thermal, Nuclear Power Explained By Hydro-Men

Physics students at Georgetown High School got first-hand information about Ontario Hydro's thermal and nuclear power plants when Charles Macintosh, central region information officer, gave an illustrated talk on Monday afternoon.

Mr. Macintosh brought colored slides to add interest to his information which he titled "Behind The Electric Switch."

He first described hydraulic generating methods, using river flow, which is presently producing six million kilowatts of energy. Forecasts indicate that by 1980, 22 million will be needed, he said, and present water power is being used to capacity except for some 2,000,000 kilowatts in northern Ontario which presently are too costly to develop.

Meanwhile, thermal plants are in process, one at Lakeview will produce almost two million kilowatts when it is in full operation in the mid sixties, and will cost \$250 million to build. It is interesting to know that this plant will use 18 thousand tons of coal daily and 60 million gallons of water. Plant cost is estimated at \$250 million.

At the same time, nuclear power is in the offing, he said, and the first atomic power plant will be operated next year on the Ottawa River. Another planned near Port Elgin on Lake Huron will produce 200,000 kilowatts.

The present R. L. Hearn thermal plant in Toronto is being extended to produce over a million kilowatts.

Mr. Macintosh's pictures included some of the Sir Adam Beck plant at Niagara, and he also touched on the St. Lawrence power project in his speech, with a brief synopsis of Ontario Hydro's history.

He was introduced to the students by physics teacher Thomas Beer and school principal J. L. Lambert.

Warden's Expense Allowance Raised From \$800 To \$1000

The Warden's expense allowance has been raised to one thousand dollars, from eight hundred in previous years. Reeve Ryckman pointed out that the annual banquet costs would vary from one locality to another, and in one area the original amount would cover it, another it would not.

The annual Warden's Dinner is a large affair with all the county officials attending, all past wardens, and most municipalities council members.

"As an ex-warden I know the \$800 did not cover the expense," said Deputy Reeve Mary Pettit.

IMPROVED ELNAR BRAND ALFALFA

Now with RHIZOBIA

Elnar Rhizobia are special strains of bacteria which invade the tiny root hairs soon after alfalfa begins to grow. They multiply in large numbers, causing the alfalfa to form a growth called 'nodules'.

Bacteria in these nodules absorb nitrogen from the air, and put it in the crop. You actually see the benefits of this 'free' fertilizer in the deeper, darker green colour of your crop.

Elnar Brand ALFALFA combines in one blend all the qualities you want most.

- Winter hardiness
- High tonnage of protein-rich hay
- Disease Resistance
- Quick vigorous growth
- Persistence of stand

... and Elnar Brand ALFALFA is

- High in weed free purity
- High in vigorous germination
- 'Gro Koted' to combat seed and soil-borne diseases

• Packed in new, washable bags, easily convertible into towels, pillow cases, etc.
