**MORE HORSEPOWER— LESS MANPOWER... THE KEY TO MORE PROFITABLE FARMING**

The basic principle of sound farming economy is getting the maximum amount of work done at the lowest possible cost. The only way this can be accomplished is with modern farm machinery.

Modern farm machinery is designed to do more work in less time at lower cost. More horsepower per man allows you to reap full benefits from today's more productive farming methods by keeping labour costs in line. It also assures you of a reliable work force you can swing into action at a moment's notice. Critical farm operations get done without delay and without depending on the availability of high cost farm labour. Whatever kind of farming you do you can look to Massey-Ferguson for the machines and implements that will do every job faster, more efficiently, and more economically.
