Home & School Groups Want Study of Effect of Teevee

Claim Students Watch Eighteen Hours Weekly

The nuclear weapons that secured Hiroshima, and now stand poised with a threat to decimate whole nations in the first wave of attack, may have less influence on man's future than the six shooters in the hands of gunmen and sheriffs that stage nightly TV battles in our living rooms.

Nuclear Power

Nuclear power — whether used for annihilation or to serve mankind — affects only tangible things. But television has the power — on a scale never before approached in the history of the world — to sway the MINDS of men. In particular, it has the power to influence the minds and personalities of children, the men and women of tomorrow. Changes in thinking and character will always be more potent than changes in things, and the television coverage that now saturates the western world is undoubtedly moulding the future, in a subtle but highly significant way.

Affecting Children

Thoughtful people are aware that TV is affecting Canadian boys and girls. But nobody has any precise knowledge of the extent to which they are being affected, nor of the direction in which they are swayed by this pervasive influence. In fact, there is little solid foundation to support a view of the overall effect of TV on our young people is either beneficial or undesirable.

Parents with TV sets can find much to say in favour of the medium. The entertainment is enjoyed by adults and children alike, many programs have strong educational value. It keeps children quiet, and helps keep them in off the street. Parents commonly use TV as a 'pacifier.'

Far Beyond

But psychologists are looking far beyond the surface advantages that can be commanded at the turn of a switch. They are speculating about long-term results to children from consistent exposure to the 'fantasy' world of television. They are thinking of the effects in the special terms of their profession — Addiction, Vicarious Habit Forming, Frustration Tolerance, Substitute Satisfaction, Identification, Interference with Practice of Real-life Skills.

Not Different

The part TV plays in a child's life is probably not different in quality from the influence of movies, the daily 'comics,' or even the traditional fairy stories. It is the quantitative impact that has made this a matter of such importance. An audience research study by the CBC in 1956 showed that "in Ottawa, the average English-speaking high school boy (with a TV set at home) views TV about 15½ hours a week, while

Something Profound

In effect, the 325,000 parents who make up the Canadian Home & School organization have said this to the BHG and the CHC: "Television is doing something profound to our children. It is affecting their habits, their knowledge, their thinking. Therefore, it is gradually changing the whole future of the country. We do not know whether the overall effect of the change is good, bad, or insignificant. But we want to know. We believe it is very important — not only to us as parents, but to all Canada — that we should know. It is possible to get the relevant knowledge, but only through a research effort that is intense and continuing. You have money from the nation that could make that effort. Will you please do it?"

Canadians in, and outside the basic Home & School organization will think this a good request. They will look to the Board of Broadcast Governors for a good reply.

Into Spotlight

The Canadian Home & School and Parent-Teacher Federation has moved this problem into the spotlight by a resolution urging the Board of Broadcast Governors to undertake comprehensive research into the effects of television upon the minds and personalities of boys and girls. Federation Treasurer, C. M. Bedford, BA, BED, MA, who drafted the resolution, has specified that Home and School want continuous long-term research into the cumulative effect of TV over a period of years. CBC audience research and short term, uncoordinated research of universities and scholars does not meet the requirements of the resolution.

Underline Need

Home & School, to underline the need they feel exists, have suggested a minimum research budget to the Board of Broadcast Governors — \$62,000 annually. This represents about one tenth of one percent of the Parliamentary grants expected to go to the CHC in

FINANCIAL LIAISON COAL SERVICES

Installment Savings Plans — More than 110,000 Canadians are planning to save \$3,000,000 with Investors Syndicate certificates.

Single Payment Certificates — with guaranteed investment value.

A Balanced Mutual Fund — Investors Mutual, Canada's largest mutual fund, emphasizes income, stability and capital gain potential.

A Mutual Fund for Growth — Investors Growth Fund emphasizes long-term capital gains.

HENRI HANSEN — R.R. 1, GLEN WILLIAMS

NOW FOR '61... 2 TOTALLY DIFFERENT TYPES OF CHEVY TRUCKS!

A GENERAL MOTORS VALUE

1. REAR-ENGINE CORVAN 95's — THE TRUCKS THAT BEGAN WITH 4 WHEELS AND A FRESH IDEA!

Here are trucks that are a full 2 feet shorter than conventional half-tonners — yet hold more payload! Corvan, for example, has 191 cu. ft. of cargo space! Trucks with one piece body-frame design, independent 4-wheel suspension and near constant weight distribution. You get light-touch manoeuvrability plus the economy of a gas-saving air-cooled rear engine. Your Chevrolet dealer has the details.

Ridewall tires optional at extra cost.

2. TORSION-SPRING CHEVROLET'S — WORTH MORE BECAUSE THEY WORK MORE!

Chevy's '61 fleet brings you the latest editions of the trucks that proved the overwhelming worth of independent front suspension. They're here with the most advanced comfort features ever found inside a truck cab. And when you add the all-new rear-engine Corvair, you'll find a Chevrolet truck custom-made for you and your job. You find new rugged qualities in every size Chevy — pickup, tilt cab, tandems — all of them. See your Chevrolet dealer today. Try the totally new rear-engine Corvair trucks, and the work-whipping, work-proven Chevrolet trucks for '61!
