See Your CHIROPRACTOR

After Every ACCIDENT

A fall on the street or in the home can cause a great variety of detrimental effects on the spine. Usually, the first part of the body to strike the hard surface is the pelvis and lower section of the spine. If the shock is too great and the supporting structures of the spine are not strong enough to withstand the SUDDEN IMPACT, the vertebrae in the lower spine may be jolted out of position. The effects of such an injury could be serious back pain, bladder disturbances, kidney disorders, menstrual distress, and many others.

Even a minor spinal injury can result in an almost unlimited variety of distressing effects. Under such conditions the accident victim might suffer some remote illness for years, never associating it with spinal shock sustained in the fall or accident.

The logical and safe way to avert unnecessary pain and distress is to recognize that spinal displacements are a possibility in any fall or accident and make it a POINT to see your Chiropractor for a spinal examination after every accident.

INSURANCE COVERAGE

Most modern insurance policies pay claims filed by Chiropractors and other well trained doctors of the healing arts. Does your policy cover chiropractic care?
