Start Construction on New School for the Deaf

Ontario Public Works Minister Ray Connell announced today that the first stage of construction for the new Ontario School for the Deaf would start immediately. Frid Construction Co. Ltd. of Hamilton has been awarded the \$3,817,000 contract.

Mr. Connell said the first stage of construction comprises the junior staff, staff residence, hospital, administration, laundry and boiler plant buildings. He hoped that the project would be sufficiently advanced before the cold weather to enable substantial work throughout the winter months. He anticipated completion of this first stage by late 1962.

"Eventually 450 will be housed in the new residential school — 300 in the Junior School, 200 in the High School and 50 in the Kindergarten," he said. "Bidding on the first stage project was with 13 firms seeking the job. Frid's bid was lowest." He expected that when stages two and three are called in future years, the total cost of the school would be in the neighbourhood of \$10,000,000.

The site is on Highway 25, South of Halton Centennial Manor. Mr. Connell hailed the early start on the school as a big step forward in providing the special training required for deaf children.

Esse Situation

He said the population explosion since the Second Great War had greatly taxed the facilities of the school for the Deaf at Belleville. The Milton School would do much to alleviate the present situation.

The Junior School will be the first to be constructed. This is a one-storey structure consisting of classrooms, dormitories and dining rooms. The classroom sector is about 350 feet by 100 feet with 25 classrooms, large activities rooms, rhythm room, projection and clubroom, library, teacher training and teacher's lounge. Classrooms of about 10 children will permit highly individual instruction. Careful control of sound in instructional areas is essential to teaching deaf children. This will be assured by the plan and construction of the buildings.

Light Signals

Special precautions have been taken for the safety of these children who do not respond to spoken directions. Vehicular traffic will be restricted within the perimeter of the campus and prohibited in areas where children might be playing. Fire alarms by light signals instead of sound will be provided.

Dining rooms and the kitchen dishwashing and bakeshop areas will be located in a 129 feet by 35 feet wing section to the classroom area. The basement will be devoted to kitchen and dining rooms, storage, washrooms and mechanical services.

The other section of the Junior School consists of the dormitory area. Dormitory wings will be divided into individual units of 30 children to permit constant supervision and to minimize institutional atmosphere. The units will be separated from each other by landscaped courtyards and linked by covered walks. There are seven units each comprising two dormitories of 15 beds, washrooms, bathrooms, showers and self contained units of bedroom and bath for the House Mothers. Each dormitory will have its own indoor and outdoor play areas, washroom and cloakroom facilities.

There is also a unit for trunk rooms, clean and soiled laundry, blanket and janitor's supplies, serving all seven dormitories.

Brick and Steel

The staff residence will be a basement and two-storey structure of steel frame and brick construction, 187 feet by 35 feet at the main core with a 60 feet by 32 feet wing. The basement will be devoted to trunk storage, games, lounge and mechanical rooms. The first and second floors will each have 20 beds, one bedroom and living room suite, a library lounge and utility rooms.

The hospital building will be T-shaped, 185 feet by 47 feet at the main core with the trans-

verse section 114 feet by 47 feet. It will house six four-bed wards, two two-bed wards, two two-bed isolation wards, dining, sewing and shipping two dayrooms, nurses' bed-rooms, matron's quarters, house-keeping room, various rooms for washing facilities, doctors' offices and examination rooms, dental and eye examination rooms.

The administration section will be contained in a one-storey 150 feet by 47 feet structure accommodating a large general office, conference room, superintendent's office, and offices for secretaries, the bus, car, dean, mimeograph machine, restrooms and special hearing room.

The laundry, 116 feet by 52 feet, is also a one-storey building having a small basement with space for assorting, laundering, sewing and shipping services and restrooms.

The power plant, also one storey, will be 83 feet by 80 feet containing boiler and electrical equipment rooms, incinerator, work-shop, engineer's office and washrooms. Heating will be by coal. A standby diesel generator will be supplied.

All buildings will be of brick construction — wall bearing in all single-storey buildings and steel frame and brick in all two-storey structures. All electrical services will be underground within the limits of the campus.

Mobile Display Boosts Hydro Uses at Fall Fair

An interesting ultra modern mobile display will be exhibited at Georgetown on September 22 and 23 and will be sponsored by Georgetown Hydro Commission.

This display will be open to the public for free inspection. It will be located in the large Ontario Hydro demonstration coach that will be stationed near the entrance in Georgetown Park during the Georgetown Fair on Friday evening and on Saturday afternoon. Chairman E. W. Binkley of Georgetown Hydro and members of the Commission urge the residents of Georgetown to take this opportunity of visiting the Hydro demonstration coach and inspecting this remarkable display.

The unique custom built trailer designed by Ontario Hydro with 4,000 cubic feet of space for displays, offers numerous interesting exhibits. Inside the modern trailer are remarkable displays which point out the benefits of modern electrical shop tools, useful for both city and farm workshops, to the most up-to-date kitchen appliances. Many of the displays contain design features believed to be unique in Canada.

Can Handle 25 a Time

About 15 people can walk comfortably through the coach at one time, but an estimated 25 more can be accommodated when the left hand side is lowered in sections to form a platform and the telescoping roof slides out to become a canopy over it.

Outfitted with a breathtaking variety of modern electrical appliances, the coach forms virtually a rolling 'house of ideas' with the accent on electricity as a modern boon and servant. It is designed for full fledged demonstration at exhibits and fall fairs, and curbside shows in front of Hydro offices and a brain used to illuminate farm public utility buildings. The yards.

Name Maurice Beaty Columbus Show Judge

Maurice C. Beaty, Landale Farm, Milton, former president of the Canadian Jersey Cattle Club, and one of Canada's best known Jersey breeders, and judges, has been selected by the American Jersey Cattle Club to be one of the judges at the All American Show at Columbus, Ohio, in October.

Mr. Beaty will assist Professor Morris on the Jersey Judging classes, along with Harold Keser, Professor of Dairy Husbandry at the Ohio State University.

Sired Three Champions

Mr. Beaty is particularly known in the United States as the breeder of Landale Beacon Bas, a bull now at the head of the herd of Mayfield Brothers in Tennessee. Landale Beacon Bas has sired such grand champion cows as Landale Beacon Gladys, grand champion at the Royal Winter Fair and other shows, who topped the Jersey females in the U.S. in auction sales. Landale Beacon Bas is also the sire of Beacon Bas Tulip, the grand champion female at the All American Show in 1960. Landale Beacon Bas is the only bull to sire three such champions, the third one being at the Canadian National Exhibition in 1958 — Landale Beacon Flashlight.

GLEN WILLIAMS

Caledon Minister at Glen Harvest Home
 Mrs. Cecil Barth
 TR. 7-2373

Harvest Home festival was celebrated Sunday morning in the United Church. The church was beautifully decorated with flowers, fruits and vegetables spilling from two horseshoes of bronze dahlias, east of plenty on tables at the front.

The grain, contained with a large bouquet of bronze dahlias, east a mellow glow on the oak communion table.

The choir sang "The Call for Reapers" and Sally Hunsdale sang a thanksgiving solo. The minister for the occasion was Rev. John Veals of Caledon East. His sermon was based on Matt 5:20. The title being: "Margins of Goodness."

He said we want excessives in everything except Godliness and goodness.

The service concluded with the harvest-home hymn "Come Raise the Song of Harvest Home."

Mrs. Edythe Starret has returned from Rochester, N.Y. where she was visiting her sister and brother-in-law, Mr. and Mrs. Ed Shrage. They came back with her for a short time.

Mariens Kemshad has enrolled at McMaster University, Hamilton, where she will take the course in Physical Education.

A family reunion was held last weekend at the home of Mr. and Mrs. Clayton Allen.

Mrs. E. Robinson of Calgary, Alta. came east. Mrs. Allen had not seen her sister for twenty-one years. Mr. and Mrs. J. P. Masales of Odessa, Florida and St. Catharines and Mr. and Mrs. J. P. and family of Bright, Ont. were all present. Also there were Mr. and Mrs. Allen's daughter and son-in-law Bill and Myrtle Everson and family, and grandchildren, Margie and Judy Williams of Stewarttown.

Church Ladies Renew Regular Meetings

The Afternoon Auxiliary of St. John's United Church W.M.S. resumed its regular meetings on Tuesday. Mrs. W. Brownridge presided and opened the meeting with a Call to Worship.

Mrs. G. Ward gave a fine devotional based on part of Matthew Ch. 5, stating that the only way to grow stronger spiritually is to feel the need of God and draw closer to Him. Mrs. Ward closed this period with reading a lovely poem "He Maketh No Mistakes" and prayer.

Mrs. R. MacArthur led in prayer for all missionaries mentioning especially Rev. Elda Struthers of Seoul, Korea.

A most inspiring letter from Mrs. F. G. Mackenzie the Presbyterian Christian Stewardship Secretary was read by Mrs. H. Curtis. In this fine message, ladies were reminded the day of God's grace is drawing to a close and they need to speed the Light of the Saving Knowledge of the Saviour as news before. In the final accounting it will be only what we have done for Christ and for those who need Him. That will be remembered.

The new recording "The United Church Women" proved to be interesting and helpful in answering many of the unspoken questions. This was followed by a discussion period.

The October meeting will be an Autumn Thankoffering at which Mrs. Stobie of Cedarvale School will be the guest speaker.

Too many people live too much in the past. The past must be a springboard, not a sofa. — Prime Minister Harold Macmillan.

STEWARTTOWN

Flower Beauty Topic At Institute Meeting

Ladies Petition School Safety
 Mrs. C. A. Grant
 TR. 7-3781

Horticulture was the topic chosen by Mrs. Fred Armstrong when as convener of Agriculture and Canadian Industries, she was in charge of the program at the Esqueving W. L. meeting. She explained that Agriculture is divided into two sciences, plant science and animal science. The plant science is again divided, into Horticulture, Forestry and Agronomy.

Among the fifteen members, there is at present only one who actually lives on a farm, and Mrs. Armstrong felt Horticulture would be of more interest to the group. She read a very interesting paper on "Prolonging the Beauty of Cut Flowers." Mrs. Armstrong is keenly interested in plants of many kinds, and although born a city girl, has lived in the country for some years, and today, along with her husband, works in the garden and greenhouse at their home on the Check line. This year she is taking a one year correspondence course in Horticulture from the O.A.C. Guelph, and her fellow members wish her continued success in her venture.

Home baked bread, and roll-home canned pickles, chili sauce, jelly and jam, brought by members to answer the roll call were ably auctioned by "Auctioneer Harris" who tried and sometimes succeeded to get that extra nickel.

A motion was made, that a letter concerning the safety of our children, be sent to the County Council, and also to the School Board. The heavy traffic and terrific speed, on the 7th line is the deep concern of parents, and friends alike. There is no sidewalk over the bridge although only constructed in 1956, when even

down, and spent several days in hospital. We as members of the Women's Institute, are interested in preventing, if possible, perhaps a more serious accident.

Mrs. W. Humphreys, Mrs. H. P. Lawson, Mrs. Walter Lawson and Mrs. C. A. Grant were appointed as a committee to compile information of members and activities of the Branch since its organization in June 1912 for the purpose of an Anniversary Book to be ready in June of 1962, when the branch will celebrate its Fiftieth Anniversary.

The Committees in charge of Mrs. H. P. Lawson spent a couple of days this past week with Mr. and Mrs. Leno Marzani, as soon as possible. Mrs. Walter Lawson was hostess to the group of thirteen members and two visitors and Mrs. W. R. Lawson, and Mrs. Herb Reid assisted her with the lunch. Mrs. J. Sanford read the Bible reading from John 10:1-18. Mrs. H. P. Lawson moved a vote of thanks to the hostess and her assistants and Mrs. Armstrong.

then the traffic was heavy. Some children arrive at school by bus, and those crossing to the 'Old School' from the buses are escorted in a body, by their teacher Mr. Bassinet, but there are many who must walk along the busy 7th Line from the check line corner, and cross the bridge which many feel is a death trap, and also cross the 7th Line at No. 15 Sideroad opposite the school, where last year one child was knocked

live better...ELECTRICALLY...
HYDRO is yours
 A host of the latest electric appliances, farm and hobby equipment are 'on parade'. From modern lighting to electric home heating—you will enjoy seeing how much more you can enjoy living electrically.
 Plan now to visit "Electrical living on tour".
