

J. F. K. STARTED THE TREND

THE TREND TO YOUTH in responsible positions generally credited to John Kennedy's successful bid for the presidency is followed here by little Robin Jones who believes you are never too young to take on responsibility. Robin last week joined hundreds of Georgetown children in assuming the weighty appointment as Junior Fire Marshal. In his home he is in charge of inspecting the area within one foot of the floor.

Declare 4-H Winners At Milton Fall Fair

The final stage of the 1962 program for Halton 4-H Clubs was held at Milton Fall Fair. The Halton 4-H Dairy, Beef and Grain Clubs Achievement Day resulted in the largest showing to be held in the county. The program scheduled for Friday, Sept. 28th was postponed to the next day Saturday. Judges for the Achievement Day included Howard Landlaw, Holstein Breeder from Peel County, Morris Freeman, Assn.ative, Wentworth County and Harvey Cochrane, Livestock Fieldman, Canada Dept. of Agriculture. Results in the various clubs were:

Arthur Lawson	912	9
Margaret Hunter	902	10

Other members in order of standing: John McGee, Ron Brander, Marion Hunter, Pete Sweetman, Don Brander, John Stull.

NORVAL

Clothing Box For Girl in Greece

The Evening Unit of the Norval U.C.W. held their regular meeting on Thursday evening, October 11, at the home of Mrs. Jack May with 16 present.

Mrs. Glen Elliott and Mrs. J. Thurlbeck were in charge of the devotional. The short talk, followed by the Scripture Lesson, prayer and a hymn were on Thanksgiving.

It was decided to send a box of clothing to the adopted Greek girl for Christmas.

Plans were made for a bazaar to be held in Norval United Church Hall on November 10th from 2-5 p.m.

Conveners for the various booths were chosen, the Tea Room, Mrs. Gordon Landlaw; Baked Goods, Mrs. William Hyatt; Christmas Booth, Mrs. G. Landlaw; Aprons, Mrs. J. Thurlbeck; Mrs. Cooley and Mrs. Bob May.

Following the business the members worked on Christmas decorations for the bazaar. Lunch was served by the hostess, assisted by Mrs. Ken Reid and Mrs. Don Cleave.

Warns Danger From Dying Elm Tree

107 Prince Charles Dr. Georgetown, Ontario

Dear Mr. Editor:

WHAT PRICE SAFETY?

Many of the readers of the Georgetown Herald, will recall the photograph of the elm tree which was referred to as the pride of Prince Charles Dr. in the Herald.

But do the same readers realize the implications of the story behind that photograph? Take a closer look at the photograph, and you will not see all the dead limbs, this tree is in a very bad state of decay and the first bad wind storm or ice storm two things will happen either a branch will come down and seriously hurt some passer by or the whole tree will come down and take out the Hydro pole and all the wires, with the result that someone will be electrocuted.

This is a situation that the town knows about and they and the Hydro both admit it is very dangerous but are they willing to do anything to help protect the people of Georgetown?

The answer is no. They think that if they ignore it, it will go away by itself.

Which is not the case, for in the end the pole and all the wires will have to be replaced, which will cost them more than what the tree will cost.

But let us just say we have some pretty short sighted men as officials here.

When one official has to

be handled with kid gloves and cannot be pushed, but only does what he wants to do who does he work for, the good of the town, or himself?

We are going ahead and cutting down the limbs of the tree which endangers our home, which in the event of a bad storm, will certainly fall towards the road, as all the remaining limbs and the weight is on that side.

So I would suggest that you tell your children and remind yourself to walk on the other side of the street whenever possible.

R. ROBERTSON

Says New Council is Needed, Minus One

Georgetown, Ontario

Dear Mr. Editor,

May I take this opportunity to thank you for allowing me space in your paper to express my views on the situation as I see it in Georgetown today.

When I write this I did wonder if I should express these thoughts in public, but having since received so many telephone calls praising my piece and agreeing with everything I said, I have given me quite a lot to think about. It has even helped restore my faith in the people of this fair town, that like humans, a town can make mistakes, but intends to rectify some of these at the next election.

As one reader stated in their conversation that what we need is a completely new council except for one man, whose name I will not mention.

Which brings to me another small matter and it is this: It appears we have a man in

Georgetown who has not himself up as Judge and Jury and at any time might ring you up and inform you that he is going to have you charged with (let's say speeding) and he has several witnesses, and there is nothing you can do about it (so he says).

Mr. Editor, as I said in your paper two weeks ago-what is Georgetown coming to. (Do we have the vigilantes back again?) or does our police force really have agents.

Yours truly,

E. R. Francis

Soil Sampling Can Boost Farm Income

J.A.F.

One of the main jobs on Halton farms at this time of the year should be the taking of soil samples. The fall months are an excellent time to take soil samples. The spring rush is avoided, and recommendations are received in time to place fertilizer or

Soil testing is an important link between soil and crop-research and individual practice. Someone has aptly stated: "The time a farmer spends taking soil samples can be the most profitable few hours in the entire year."

laboratory, experiments during the past ten or fifteen years, has given me quite a lot of help. The time a farmer spends taking soil samples can be the most profitable few hours in the entire year."

In the year ending March

31st, 1962, 36,077 soil samples were analyzed in the Soil Testing Laboratory at O.A.C. What is the return to the farmer for time spent taking and submitting soil samples? It could easily be \$25.00 or more per hour, depending on the crop to be grown. This is due to the use of increased fertilizer and rates of plant nutrients.

Halton farmers may obtain
