

Now They're Cookin'

LIFT THE LID OFF SCHOOL KITCHEN, CAFETERIA

Peter Jones, Georgetown

ABOUT THE MOST MODERN area in the Georgetown and district's most modern composite school, the glistening cafeteria is bubbling with culinary and conversational life. The kitchen-cafeteria began operating Monday when several hundred scholars sat down in the cheerful dining area to officially consume the first lunch coming out of the cooking area. At top right,

the manageress, Mrs. Edwards of Streetsville, takes a peek at the main course being prepared in one of the kitchen's ovens. Below kitchen staff members Mrs. Tom Hutchinson, in the foreground, Mrs. G. Baker and Mrs. G. K. Urquhart ready desserts and dishes. Mrs. Hutchinson is working at the preparation area in the centre of the kitchen. At top right is the serving area.

Students file in the door at extreme right and past the serving counter. The refrigerator has two doors front and back. At bottom right is the well-lit dining area which can accommodate 300. The tables are comfortable and fold into study benches when it is not in use. There is also ample accommodation in a smaller dining room for the present staff.

Accident Ratio Jumps In Halton Last Year

The accident, injury, fatality and property damage rates in the North Halton OPP district surrounding Milton, Georgetown and Acton increased greatly this past year. There were 419 accidents, 10 persons were killed, 163 were injured and \$210,177 worth of property damage resulted. In 1961 there were 375 accidents, two killed, 129 injured and \$161,594 in property damage.

PAINTINGS PRESERVE HISTORY OF HALTON

Landmarks of Halton County, fast disappearing in the modernization of the area, are being preserved in a series of about 100 paintings by Harold J. Newman of Georgetown. The work has been proceeding over the last two years and the scenes are now preserved in the Halton County Museum, of which Mr. Newman is curator. Among scenes in 54 Halton communities Mr. Newman has chosen landmarks in Proudfoot's Hollow on the Dundas highway and the former town of Glenora near Henderson Park in Oakville. He has painted a house scene in Moffat of a structure built in 1861. No buildings are left in Glenora today however and all Mr. Newman could paint there was a road.

June Worst

December was again the bad month for accidents, with 54 separate crashes; June was the worst month for deaths and injuries, with four killed and 33 hurt; and August saw the most property damage of any month, \$36,260.

The Record

The following table shows the total by months:

January	34	5	\$3,070
February	26	6	18,510
March	23	10	8,630
April	21	11	6,945
May	33	16	14,515
June	35	23	16,925
July	37	19	15,790
August	29	7	36,260
September	35	17	13,460
October	43	14	16,275
November	47	18	31,835
December	54	17	16,442
Total	419	163	\$210,177

FARM NEWS

Heated Water Bowls Good for Livestock

During the month of January 1961, the average temperature in Halton County, was 21.5 degrees F. Over the years the average temperature for January has been 25.3 F. Halton County has three months each year in which the long term average temperature is below freezing. This means of course, that unprotected water supplies freeze. Usually the heat in the barn has been sufficient to prevent major freezes.

With the adoption of the hose-hosing system satisfactorily heated water bowls become a necessity. When an operator installs a heated bowl, one of the first considerations is location. Halton county farmers have found that the water bowl should be located close to the feeding area, and walk ways. The livestock should be able to reach it 24 hours a day without travelling too far from their feed. For cattle and maximum use, it should be in a sheltered area out of the blast of wind, and in a high, dry area away from mud and drainage. If it is located in a sheltered area with a southern exposure the heating element will not be required to operate as often and manure and ice buildup will thaw on sunny days. Finally it must be located so it will not interfere with cleaning operations or future expansion. When everything is considered, it is more important to locate the bowl where it is most convenient and comfortable for the cattle and the operator, than to attempt to save money by locating it close to existing water and power lines.

Unemployment Dips Slightly Last Month

At the end of December, 1962, there were 1299 persons registered for work at the National Employment Office in Brampton, down slightly from the end of December, 1961, when 1380 were seeking work. During the calendar year ending December, 1962, the National Employment Service placed 3,460 persons in jobs, 551 more than were placed during 1961. The Brampton Employment Office serves Chingacousy, Caledon, all of Dufferin County and part of Essex Township including Georgetown.

ident than other types. The use of the correct type of insulation in the correct places will greatly reduce operating costs. Finally, a good deep water supply trench will ensure that the water bowl will be well above freezing when it reaches the bowl.

Banquet, Bake Sale Planned by Ladies

The All Star Ladies Support Group held their monthly meeting at Mrs. Bill Richmond's on Monday, December 10. The ladies are planning to have a Bake Sale some time in Feb. They are also making plans for the Annual Hockey Banquet to be held later on in the year.

WELCOME TO COME

Any mother with a boy on the All Star teams or interested in hockey is welcome to come to these meetings. The next meeting will be held at Mrs. Sam Walker's on Monday, January 14th.

- Cost of operating approximately \$3.00 per year.
- Automatic operation with large heat reserve.
- Provides year around protection from chilling.
- Provides sleep inducing relaxation.
- Prewarms the bed before retiring.
- Dries the bed clothing.
- Generous five year warranty.
- Refund within 10 days if not satisfied.

Resident Comments on Judge Langdon Articles

7 Young Street, earned the Finance companies Georgetown, Ont. are all right providing they are taxed properly. This money is stilling, a nut which utilizes both water and electricity. Plans showing a typical recommended installation are available from the Milton Office of the Ont. Dept. of Agriculture.

Dear Editor: In this week's Herald you printed an article by Magistrate Langdon on how we may improve our society. One of his suggestions was that no one under 21 of years of age should be permitted to get a marriage license. I agree with that suggestion but in my opinion passing a course in sex education is like taking a course in driving test; just because you pass the test doesn't mean you are willing to accept the consequences of a lifetime of problems for a while. The solution is a person who does not know his own mind at 21 years of age shouldn't get married. I don't think completing a course means the marriage will be successful. Judge Langdon went on to say that when a wife is forced to quit work, they can take the added expense of war and a home. Some people think collect for a short while. The regardless of the price and possible for unemployed men, that's why they turn to the not for women who live of Finance Company when pre-working, or wish to have child sure hits. As far as I am concerned it has been abused so badly that there is very little left for anyone so the responsibility falls to our community for welfare which means that the person or persons who are employed are paying the bill twice by their taxes, while other people sit back and let the world go by.

When you speak about depriving the children of actual necessities, it wouldn't matter if employed or unemployed money would go for alcoholic beverages.

Yours truly,
W. M. McMurdo

Set April Dates For Rotary Show

The word is finally out from the Rotary Club, there will be another show this year. The title and contents are still very hush-hush, but the dates have been set for the 5th and 6th of April in the High School Auditorium. A committee of John Walle, Bill Hamilton, Ian Cass and Ralph Ursel have been appointed to "get the show on the road."

Last year Canadian Red Cross medical, nursing and technical personnel served in the Congo and Morocco.
