Cultivation Gives Proper Soil for Garden Growth

by Gordon Lindsay Smith

It may be necessary to water this down or at least firm it by tramping. Then the seed is sown fairly thin, and merely hoed the garden. It is well, of course, that weeds are destroyed because they certainly do not add to the appearance of flowers or even vegetables and they do rob the plants we want to grow of food, moisture and sunshine. But the main reason for cultivation (and this is why it should be carried out regularly at least once a week during the first part of the season), is to let the air into the soil, to conserve moisture, to work in fertilizer and manure, in other words to produce the right climate or environment for our flowers and vegetables.

Regular cultivation alone will make a surprising difference in the texture of the soil, will break up the hard lumps and make it more open or friable, as the experts say. But the wise gardener will do more than just cultivate to build up his soil. He will add humus by digging in barnyard manure if he can get it, or straw, rotted leaves, vegetable refuse, peat moss and so on. In cases where the garden soil is very heavy clay he may also add sand, or ashes. For sandy soil, too, he will dig in straw, leaves and compost. He will also add chemical fertilizer, of the kind recommended by seed houses for his particular type of soil or for the kind of flowers, grass or vegetables he intends to grow. Not all require the same food, some like bone meal, some need nitrogen, some potash.

Where the garden soil is naturally heavy and it is difficult to get a good catch of carrots, beets or parsnips it is a good plan to dig a trench about a foot wide and deep. This is filled with compost mixed with some fine and enriched soil, shrubs, or creeping vines, heads and perhaps a little sand. Heavy rains will invariably wash

Active Ashgrove Lady Has 85th Birthday

Mrs. R. J. Graham has returned home from an enjoyable 2-weeks plane trip to Indian Rock Beach, Florida. She was accompanied by her daughter and husband, Mr. and Mrs. Maurice Dixon of Kapuskasing and his parents, Mr. and Mrs. Dixon of Toronto.

Happy birthday greetings to Mrs. George Nurse who celebrated her 85th birthday, the end of April. She is quite active and attends church every Sunday and all our meetings and now is planning her garden which gives her great pleasure.

Congratulations to Mr. and Mrs. Doug Ward on the birth of their baby boy on April 22, the second great grandchild for Mr. and Mrs. C. B. Dick.

Don't forget this Sunday is Mother's Day, the day when we can show her just how much she does mean to us. The flowers we wear on Mother's Day. Tell a story of their own. The 'rosy ones speak of joy today. The white ones of sorrow known. But whatever the color it matters not. A like fragrance they impart. Giving thanks for a mother's thoughtful care. With love from a grateful heart.
