SCHOOL'S OUT!

Up to this point in the year children in Georgetown have been spending a great deal of their time in school but with summer rolling around again, they will once more be on their own about town. This means that drivers should be doubly careful when driving during the summer months. You can always expect, the unexpected when exuberant youngsters let out a hoop and a holler at the end of another school-year. They have a way of dashing out from behind parked cars or racing across intersections without warning. By keeping a sharp lookout and a slow speed, we can make sure that they will ALL return to school next fall

WE'VE FOUND A USE FOR RUST

Would you be surprised to find that rust is a compon ent in the memory core of a computer, the transformer core of a TV receiver, or the antenna rod for radio or radar equipment" Well we would be too, except for the fact that there is, and it serves a useful and important purpose. Iron oxide crusti from scrap iron, in the form of territes with excellent magnetic properties, are being produced by our Northern Electric Company These low cost components can be molded into any desired form and lose name of their officiency when ministurized. In the telephone industry ferrite materials are applied to electronic switching systems, electronic switchboards and are expected to be the heart of a push button touch tone dial which is being developed. As a matter of fact, few communication systems presently under design, or foreseen for the lature, will be without a high percentage of ferrite components.

TRULY CANADIAN

A great many people do not have a clear idea of the scope of The Bell Telephone Company of Canada, and I would like to take a few times and perhaps shed some light on the subject. Contrary to popular conceptions, the Bell does not extend from coast to coast, as our name might imply, but serves Ontario, Quebec, and a large section of the Northwest Territories and Labrador As we do serve a very large segment of the Canadian generaphy, we must have a rather large employee body which now numbers more than 35,000 people. Sinety-three per cent of our total stock is owned by over 150 000 Canadians residing in Canada. In 1962 the Canadian economy was stimulated through the Company spending over \$600,000,-(HH) in Canada in the form of wages, taxes, construction, operating costs and many other categories too numerous to mention in order to bring to our more than 2,600,000 customers, the best possible telephone service at the lowest possible cost
