ON THIS BEAUTIFUL NEW **McCLARY-EASY** Meter'd-air DRYER

TAKE A LOOK AT THE WONDERFUL FEATURES OF THIS MACHINE.

METER'D - AIRE DRYING

McClary-Easy's Meter'd-air system gives you more drying — economically — and uses less electricity. In fact, Meter'd-air drying cost 25% less to operate than cylinder becomes pre-heated while keeping the other dryers incoming air travelling around the heated net Cool. Then the air is drawn through a special "metering" intake, over and through the heating unit then evenly distributed through the clothes as they revolve in the perforated cylinder.

6-WAY VENTING

The McClary-Easy 200 Dryer can be installed anywhere without alterations in the dryer cabinet. There are provisions for venting 6 WAYS — UP, DOWN, FRONT, BACK or EITHER SIDE! Wonderfully convenient!

SAFETY DOOR

Foolproof switch, hinge operated and inside the cabinet, shuts off the mechanism the moment door is opened... can't restart until door is closed.

OVERSIZE LINT FILTER

Cylindrical lint filter with over 200 sq. in. of effective filter area has more than twice as much as most other makes. Lint cannot build up inside dryer because air is vacuum-drawn away, not blown into filter.

SPECIFICATIONS - METER'D-AIR 200 DRYER

- SAFEGUARD ELECTRICAL SYSTEM** — Guards against blown fuses or damaged motor. Easily reset. Power automatically disconnects in case of belt failure.

FINANCIAL OUTLOOK
What Others Say
by Henry Timmins
The market has been... by satisfactory, surpassing 1962's peak \$246 billion by a comfortable margin. A bigger jump out of the relatively narrow trading of 725-745 where it has been since late August and with fourth quarter earnings...
The market can expect some important support from these key determinants — earnings and dividends.
The strength of the D J follows the upward of recent weeks, and overall corrections of between 5 and 7% could be expected.
This is a market for professional investors should which further significant progress would be noted.
Selected Canadian industrial stocks posted wide gains during the past week and several of these new highs were established that have started for a day or the few presently unfavorable points or 125% to a new all-time closing peak of 650.47, more or less a professional titate a major downward stock market with the pro's and in market trend at the moment.
The N.Y. market was stronger and a gain of 700 points or more placed the Dow Jones Industrial Average at 745.08, nine-tenths of a point from its all-time high set Sept. 20th, 1963.
BARRONS (N.Y.)
Generally, corporate profits this year are likely to be high.

MOODY STOCK SURVEY N.Y.
Although rising earnings and dividends have permitted some upside slack, stocks are still generally valued at about 19 times earnings and a 3.1% yield on Moody's 125 industrial stocks such a background coupled with uncertainties about tax legislation, may mean further erratic market behavior.
BARRON'S CANADIAN REPORTS
In the opinion of many observers, North American stock markets have moved to a level that suggests some near-term corrections are imminent. It is not anticipated that an outright "bear" market will follow the upward of recent weeks, and overall corrections of between 5 and 7% could be expected.
This is a market for professional investors should which further significant progress would be noted.
