WELL, NOT EXACTLY. Ten years ago, polio was a major killer of youth; today, vaccine has made the disease a comparative rarity. But, even when polio was claiming lives by the hundreds, traffic accidents were killing more people under 25 than any other single cause of death-and they still are.

- Do we have an accident vaccinb? No. People can't be vaccinated against accidents, but the toll can be reduced through the teaching of correct driving habits-and safety habits-to our teen-age population at the formative stages in their lives. This is what the automobile in-

surance business does through its sponsorship of the National Teenage Safe Driving Championship- ' the culmination of a coast-to-coast . series of safe driving competitions involving more than 30,000 young drivers in 225 Canadian communities each year.
