Cultivation Controls Ox-Eye Daisy Weed

V. E. McArthur, Weed Inspector, County of Halton

Ox-eye Daisy and the Hawk weeds, which include Orange Hawkweed and King Devil, are pernicious that have spread to this country from Europe and the Field Crops Branch of the Ontario Department of Agriculture states that they are especially troublesome in pastures and hayfields, which cannot be plowed and brought under a short crop rotation.

Ox-eye Daisy, a relative of the chrysanthemum has short, thick root stalks which show great vitality, with many stems growing from one root. The plant grows from six inches to three feet in height and the flowers, which are quite attractive, are one to two inches across with bright yellow centers and white edges. Even weeds can be beautiful in fact I have known housewives, who had such admiration for daisies to pull them up by the roots and transplant in their favorite flower garden.

Orange Hawkweed is often called Devil's Paint Brush because of its bright orange-red flowers borne in clusters on the top of a nearly leafless stem that grows from twelve to eighteen inches high. This weed is a real problem in permanent pastures in Northern Ontario. King Devil is troublesome mainly in Eastern Ontario. It is much like Orange Hawkweed but may be distinguished by

Attention Farmers!

For milking cows on pasture follow the MASTER SUMMER FEEDING PROGRAM. Cows milking at a high level on pasture require a high energy, low fibre ration. We recommend MASTER 16% DAIRY RATION or MASTER 16% MILK PRODUCER to overcome the problem of a mid-summer slump.

These feeds are available in Mash, Krum and Pellet form, and if you have an empty grain or bulk feed bin we can deliver bulk feed in two ton lots or more saving you money.

WEEVIL CONTROL IN GRAIN BINS

KEEP YOUR GRAIN WEEVIL FREE by following HOWARDS WEEVIL CONTROL PROGRAM this year!

BIN TREAT - Spray your grain bin walls and floor with HOWARDS BIN TREAT before storing grain. It kills weevil in cracks and crevices and has prolonged killing action. It does not harm the Grain.

GRAIN GUARD - It mixes easily with your grain as it is being binned. It protects the grain until it is used.

BIN FUME - For grain already infested with weevil use HOWARDS BIN FUME.
