In addition to physiotherapy in approved private facilities, prescribed medically necessary treatment in the patient's place of residence will be provided if, in the opinion of the attending physician, the patient cannot attend the physiotherapist's office. Cites Business Growth Blue Mountain Pottery

Georgetown Women's Institute met in Knox Hall on Wednesday evening, September 2nd for their first meeting of the fall season with twenty present. Following the opening exercises the minutes of the previous meeting were read, and the correspondence dealt with. In reply to a request from Care, it was agreed to send a donation. Mrs. A. Mathews and Mrs. Guy Bussell were named as delegates to attend the area convention, which is being held at Guelph Sept. 29th and 30th.

Agriculture and Canadian Industry was the topic for the September meeting. Miss L. Campbell gave a paper on Agriculture, pointing out the vast changes in recent years in growing and marketing. Modern farming and research has made it possible for the housewife to choose from thousands of different foods. All industries benefit from this high standard of efficiency in agriculture, as no county can be truly prosperous without thriving agriculture.

Mrs. Stan Lyon, for Canadian Industry, gave a paper on Blue Mountain Pottery, which is a truly Canadian product and was first established in 1940, by Jozo Weider, a native of Czechoslovakia, in the basement of a barn in the hill area, with 2 or 3 people employed. Now, after three new locations, each to a larger area, the plant is located at Collingwood, and the employment registrar has reached 75.

Magistrate's Ruling to Go to Supreme Court
Among stated cases going through the Supreme Court now may be one concerning the ruling given by a local magistrate in a plaza hearing recently.

Magistrate Kenneth Langdon of Georgetown said he hoped his case would be one of them and thought it was, although he could not say for certain.

Deputy Transport Minister Alan McNab said that as yet no legislation had been discussed for bringing before the Provincial Government concerning the plaza controversy.

He added that the matter was one which required careful consideration and if new laws were enacted they would have to be very specific. A spokesman for the Attorney General's office said any new rules would result in amendments to be made to the Highway Traffic Act, and these would have to be discussed by the Cabinet.

Does the very thought of last year's home heating bill bring tears to your eyes?
Take heart and look at the low-cost advantages of natural gas heating. A mere glance at the facts will bring a smile to your face.
Fact number one: modern automatic gas heating equipment is remarkably low in cost.
You can actually rent a gas conversion burner for as little as \$2.95 a month, payable on your regular gas bill. Or you can buy a new gas designed furnace for as little as \$3.80 a month—and you can take up to five years to pay if you wish.
Fact number two: natural gas home heating will reduce your fuel costs.
Whether your home has normal or extra-thick insulation, you'll find that your fuel costs are consistently lower with gas than with either liquid fuel or the so-called "flameless" heating system.
Fact number three: no other fuel is as dependable as natural gas.
You never have to order gas—it's always there—saving you frayed temper and anxiety. Stormy weather that knocks out power lines and snarls up traffic can never keep natural gas from heating your home.
Over half a million people in southwestern Ontario are already smiling with natural gas. Why not join them?
Call your heating contractor, department store or gas company soon.
