Riding Redistribution C Controversy

By Guya Kinsey

Disenthantment with "impartial Commission" methed of redistributing electoral districts lies heavy over Queen's Park these days.

After their first angry reaction to the report of the Spetion of Electoral Districts in Department of Municipal Af-Ontario, individual members affected in one way or another by the legislative clerk's office. the proposed changes have

since become more cautious in do not want to appear as critles of the principle involved that of redistribution by an Impartial commission.

DAZZIED BY FIGURES

ring of course to the brand new telephone directory we a receive this time of year. The autoide lacks the frashest and newest, but remember it's there mainly to hold the incides bel - It's the new and changed listings that are most im-

portant. Sa, to keve yourself time and availd wrong numbers, he sure to look the number up and lat it down before you . call. Handy little Blue Books ideal for recording your personal list of telephone numbers . . . are still available free of charge . . . just call our Business Office - 877-2292. and we'll sand you one.

MOVING TIME

In Spring, so they say, a young man's fancy turns to thoughts of love, but there appears to be room for other thoughts too - such as moving.

The hig shift takes place each spring with increased regularity. People move across the street or across the town in search of bigger home, a smaller apartment, or sometimes a more fashionable address. If you're one of the people on the move this year don't

forget that your telephone service has to be moved too. By giving us adequate notice, service to your new residence can be ready for you when you arrive thus preventing possible loss of important calls.

As soon as the details of your move are complete, call our Business Office at 877-2292 - one of our service representatives will be pleased to look after you.

TO BE HEARD

If folks sometimes have difficulty hearing you over the telephone, it may require only a slight twist of the wrist to make your voice come in loud and clear. Seeing television performers talk or sing over microphones that may be located 18 inches from the mouth or ssupended overhead out of sight may give us the impression that we can do the same with the telephone. We may carelessly talk with the telephone transmitter held anywhere from beneath the chin to above the nose.

But the telephone is not a broadcasting device. It is an instrument designed for personal - and private - conversation. It has been engineered to operate most efficiently when you speak directly into the mouthplece - with your lips about an inch away.

You need speak only in normal tones to be heard clearly - if you hold the telephone directly in front of your mouth and speak into the transmitter.
