WARN CHILDREN SPRING DANGERS

Now is the time for parents to make their children aware of the dangers of spring. Weakened ice over ponds, swollen creeks, water-filled ditches, and stronger river currents annually take the lives of many children who would still be alive if their parents had impressed on them the hazards that come with the end of winter.

"As the temperatures moderate, the rivers and streams become more and more potential death traps," Georgetown Police Chief Roy Haley warned yesterday. "I hope that parents will make a special effort during this thawing period to instruct their youngsters to stay away from water, and make a point of knowing where their children are at all times."
