THE STARS SAY

By ESTRULLITA

FOR THURSDAY Business and financial mat ters continue to be governed by generous influences. Just one admonition however: Don't even consider monetary trans actions with strangers in the late p.m. It is always advisable to be cautious of such involvements, but some unusually dublous offerings could be presented on Thursday evening.

FOR THE BIRTHDAY

If Thursday is your birthday, your horoscope indicates that within 10 days, many pressures of the past-in both your personal and business life should lift, and that you may then feel more encouraged than you have in some time to expand your interests. This will be entirely feasible, if you operate conservatively. Some small, but good "breaks" in financial matters during the first two weeks of August should give your morale a boost, but a really propitious period along these lines is indicated between mid- September and mid-November -to be followed by other good cycles for fiscal advancement in early December, next February and March. It will be important, however, to avoid undue extravagance and any kind of speculation for the next 12 months-but especially during the first two weeks of November and the last two weeks in December. Best periods for Job advancement: Late. July, September, early December, next January and March.

Both your sentimental interests and your social life should prove most stimulating during the year abead-especially between now and Sept. 15, and between mid - November and Dec. 31. Next good periods along these lines: April and May of next year. If careful to avoid your innate tendency towards obstinancy with those in close circles, you should find most personal relationships unusually harmonious. Most propitious periods for journeys of any length will not occur until early 1968. Short trips taken before then could prove highly enjoyable, however.

A child born on this day will be hypersensitive, emotional and creatively inclined.
