## Farm Accident Survey Shows Improved Safety

From April 1st, 1967 to March 31st, 1968, the Women's Institute of Halton County conducted a farm accident survey. This was similar to the survey conducted in 1959. A total of 29 W.I. members reported the accidents in their communities.

During this period there were 40 accidents, two of which were fatal. These accidents accounted for 515 days of work, \$7,050 in medical bills, and close to \$95,000 in property damage.

However, in comparison to the 1959 survey this was a great improvement. That year there were 111 farm accidents in Halton County with the days of work, the medical bills, and the property damage more than double this past year's figures.

"Farm people are becoming more safety conscious because of the activities of Halton Farm Safety Council. If Workmen's Compensation rates for farmers are to stay at the present levels, or be lowered, there must be an even better record.

### Life's Little Problems

Nothing trivial this week. I'm feeling to ask, and answer, some questions about the more profound aspects of life. If you don't like the answers, supply your own.

When is a politician, during an election campaign, going to promise the populace the moon, and then remind us out loud that it is not some otherworldly essence called the Government, who will have to pay for it.

Answer: When we find out, which may be any day now, that the moon is really made of green cheese, after all.

Why are teenagers so often unbearable? Because, like babies, they have learned quick that the best means of getting attention is to raise a stink, literally and figuratively.

What happens to my socks? Every time my wife washes, I lose one sock. Never a pair, always singles. Just checked my drawer, and I have nine single socks, no two matching. They're about as useful as antlers on a rabbit.

Answer: There is a little man with a bizarre taste in socks built in to these new fangled automatic washers or dryers. It never happened with the old upright and the clothes line. At least the dealer could tell you before you bought the machine.

Solution? Buy all my socks the same color. But this would spoil my image. I've always been noted for my dashing socks — gray, light-gray, dark gray, dark blue or black.

Where did this vile canard begin that men are babies when they are sick? They're supposed to be winning, querulous, demanding sympathy. This is poppycock, at least in our family. Hugh and I want only to be left alone when we are ill. It's the females who talk and fuss about how they feel, discuss every twinge, demand fresh tea every half-hour and complain about the slowness and slappiness of the service. After three weeks of it, I know.

Why do black people foot during riots? For the same reason something for nothing; partly for the sheer hell of it.

What has Pierre Elliott Trudeau, who is older and has even less hair, got that I haven't? Not much, really, except a million dollars, a brilliant mind, bags of charm, no family attack
