

GEORGETOWN GETS ONE MEMBER

North's Voice Small on New County School Boards

The make-up of the new County School Boards, both public and separate was disclosed to Esquimaux Council Monday night, one by letter, and one by Reeve George Currie.

The County Separate Separate School Board will have fourteen members, seven from Burlington, five from Oakville, one from Georgetown and one from the combined municipalities of Milton, Acton, Esquimaux and Nassagaweya.

Every four years the representation will be reviewed.

The County Public School Board will be an eighteen man board, with another two members at large from the separate school system, who will only have a vote on secondary school matters.

On the County Public School Board Burlington will have eight members. Oakville six, Milton one, Georgetown one, Esquimaux one and the combined municipalities of Acton and Nassagaweya will have one.

Council okayed the laying of water mains by Milton, on land that will belong to Milton in January, but at present is in Esquimaux. The land was annexed by Milton.

The water mains are to service Beaver Lumber and Starr Steel.

Esquimaux council came out strongly opposed to the County engineer's proposal of making the dedication of 17 feet of property, a condition for land separation.

Reeve George Currie stated, "I don't think they should get 17' for free."

Agreeing Deputy Reeve Tom Hill said "I don't think people should have to give their land away, if the County wants it let them negotiate for the 17 feet."

The rest of council agreed with this stand.

Birthdays are extended to little Sandra Falho who will celebrate her second birthday on Monday, September 2.

Mr. and Mrs. John Hannah and family spent last week holidaying North of Minden.

Mr. and Mrs. Ronald Plant and David enjoyed a vacation with Mr. and Mrs. Fred Arnold at Port Elgin and not at Wasaga Beach as previously reported.

Mrs. Jim Hamilton

Surrounding the central display, along the perimeter of the show room, are similar scenes. But what they depict are various stages in the treatment process which contribute to the Ontario system's current reputation as one of the best in the world. Generally, that is.

There are still potholes in the system. Halton County's century-old jail at Milton has been criticized for being one of the deepest.

There are leg chains, hand-cuffs, and a heavy iron lock with huge keys in use at the main gate of the Lincoln County jail until about two years ago.

Complete with hand-made figurines, there are two scenes depicting closet-sized cells in the Halton jail and a group of prisoners seated in the yard making juke boxes, the forerunner of modern trades training.

Central to the display is the model, mounted on a revolving turntable. Surrounding the grey painted model are several cubicles containing artifacts from an era in Ontario penology which is rapidly coming to a close.

Among those attending were: from left to right above, William Coats, Acton D.H.S.; Acton, Mrs. Verma Darcos, Georgetown D.H.S.; Georgetown; J. McGuigan, Bramalea S.S.; Bramalea; and J. R. Marshall, vice principal of Port Credit S.S., Port Credit.

At Georgetown area youth told Magistrate James R. Black he did not think he was being careless when he took a ride on his motorbike made for two July 16.

Constable Arnold VanClief of Georgetown Police testified he saw the 22 year old driving down the street with a girl in front, a girl behind and another person also squeezed onto the back seat. He said the bike seemed to veer sharply to the right and the driver "seemed unsure" of himself.

"Could you see over the person in front?" queried the magistrate. "How many persons is the bike made for?"

"The advertisement said two but it could be more," replied the accused. "I don't think I was careless and I had good control."

"If you think you can drive a motorcycle with one in front and two behind you shouldn't drive at all," rebuked the magistrate. "Fortunately you were not on the highway long."

He imposed a \$25. fine and costs for seven days, and suspended his licence for 60 days while the Ontario Department of Transport investigate his ability to drive.

Other statistics contained in the report: Adults and children admitted 170 Deaths 2 Daily average number patients 47 Percentage of beds occupied 70 X-Ray examinations 510 Emergency visits 235

Former dairyman, Lorne Masales a maid at the Ontario Reformatory rented the building from H. K. Porter Co. Ltd. who also own the nearby home occupied by Mr. Masales and his family.

Cattle lost in the spectacular blaze were part of the tenant's herd. Mr. Masales who also breeds Shetland ponies rescued a lame mare from the stable with the help of neighbour John Foley.

Mr. Masales and son, Scott, 6 left the barn minutes before it was struck.

"I was going to let the calves out after getting a bite of supper. They would have been out side anyway, but we have a green field back there, and I didn't want them loose to get into the green stuff."

After leading the mare to safety, Mr. Masales' neighbours and firemen drove some of the cattle outside. Others panicked and headed back into the blazing stable.

Ironically, the storm that set the fire pitched in to help firemen do us, with a cloud-burst of rain.

HORNBY

The Gates-Campbell reunion was held recently at the Rockwood Park with 37 members of the club attending. Mr. and Mrs. Peter Gates of Lowville were the host and hostess for this year. Following a bountiful picnic lunch at noon everyone enjoyed a social visit. The couple travelling the farthest was Mr. and Mrs. Donald Campbell of Port Perry. The youngest member present was Donnie Smith of Hamilton and the couple with the largest family was Mr. and Mrs. Archie Gates of Acton. The president for 1969 will be Mrs. Winnie Hamilton.

Get well wishes are extended to Billy and Mary Stout, who returned home last Wednesday from the Milton-District Hospital where they both underwent surgery.

The Hornby "H Squirt team" were treated to a corn and wiener roast on Thursday night at the home of Mr. and Mrs. Stanley May. Due to the rain and thunder, storm all activity had to be held indoors.

Mr. and Mrs. John Hannah and family spent last week holidaying North of Minden.

Birthdays are extended to little Sandra Falho who will celebrate her second birthday on Monday, September 2.

Mr. and Mrs. Ronald Plant and David enjoyed a vacation with Mr. and Mrs. Fred Arnold at Port Elgin and not at Wasaga Beach as previously reported.

Mrs. Jim Hamilton

CNE Features Halton's Jail As "Horrible Example"

The Department of Correctional Services has on display at the CNE a model of the century-old Halton County jail as an example of the provincial penal system at its worst.

The display housed in the Ontario Government building at the west end of the CNE grounds, was built entirely by inmates.

Central to the display is the model, mounted on a revolving turntable. Surrounding the grey painted model are several cubicles containing artifacts from an era in Ontario penology which is rapidly coming to a close.

Among those attending were: from left to right above, William Coats, Acton D.H.S.; Acton, Mrs. Verma Darcos, Georgetown D.H.S.; Georgetown; J. McGuigan, Bramalea S.S.; Bramalea; and J. R. Marshall, vice principal of Port Credit S.S., Port Credit.

Cow, Calves Perish as Barn Hit by Lightning

Georgetown sent a truck and eight firefighters to protect Acton while that town's smoke-eaters battled a barn fire during the height of one booming electrical storm Thursday.

A cow and five calves perished in the fire. The landmark barn on the second line burnt to the ground in less than an hour.

Former dairyman, Lorne Masales a maid at the Ontario Reformatory rented the building from H. K. Porter Co. Ltd. who also own the nearby home occupied by Mr. Masales and his family.

Cattle lost in the spectacular blaze were part of the tenant's herd. Mr. Masales who also breeds Shetland ponies rescued a lame mare from the stable with the help of neighbour John Foley.

Mr. Masales and son, Scott, 6 left the barn minutes before it was struck.

"I was going to let the calves out after getting a bite of supper. They would have been out side anyway, but we have a green field back there, and I didn't want them loose to get into the green stuff."

After leading the mare to safety, Mr. Masales' neighbours and firemen drove some of the cattle outside. Others panicked and headed back into the blazing stable.
