**AEROSOL CANS**

Aerosol cans are used for a great number of products these days and they are a real convenience. Don't ever throw them into an incinerator or bon fire, though to dispose of them. They are highly explosive. Similarly, do not leave insect sprays or any aerosol can in the back window of a car. The heat from the sun could explode it.

Don't give fire a place to start — clean up.

**GET RID OF IT**

Saturday is a golden opportunity to dispose of bulky discards which would not ordinarily be taken in the garbage pick up.

See ad elsewhere in this issue advising where to call to have the litter truck collect this on Saturday.

Help keep Georgetown clean.

**Would you pay \$1.75 a month to never have to worry about running out of hot water?**

That's all it costs you to rent a standard size Natural Gas Water Heater. Or, for \$1.95 a month, you can rent an even larger Natural Gas Water Heater.

And if renting is not your style, buying a Natural Gas Water Heater is as simple as making modest payments on your regular gas bill. Whichever way you choose, you're not going to have to worry about running out of hot water.

A Natural Gas Water Heater is easy to install and keeps your home in continuous, abundant supply of hot water because of its tremendously fast recovery.

For the low price you pay, it's difficult to think of an energy source that can heat water faster than natural gas.

If you want the assurance of lots and lots of hot water for a little, little amount of money, run out to your plumbing dealer, department store or United Gas right now. And never run out of hot water.
