PINK SALMON PREPARE FOR DEATH

Pink salmon never live to a Br ripe old age. Death is literally Er just around the corner as they Ki spawn and die when two years I old. Before they spawn, pink A salmon stop eating and their Inflesh starts to deteriorate in preparation for de...h which w will occur shortly after spawn-

In spite of this sad life history, a good spawning run is established this year in Lake Superior streams. More than 20 salmon have been collected and many spawning specimens have been seen. Their eggs were collected for the Port Arthur hatchery by department of lands and forests staff.

In 1955 lands and forests attempted to establish pink salmon in Hudson Bay for a commercial species to aid the area's Indian populatio... About 20,000 of the fish, left after the fast plane load, were turned over to the Port Arthur hatchery.

In 1959 there was a small spawning run in some creeks but it was anticipated the fish would disappear after a few generations. The 1965 spawning run provided only a couple of specimens and it appeared this run might be the last. In 1967, however, department staff collected 11 specimens about 17 inches long, and in good cond-

The pink salmon is a plankton feeding species and is not primarily a sportsman's fish although some are caught on lures. This species is more NORVAL - 877-9552 suitable, for commercial fishing than for sport fishing in the same way that whitefish and
