

NOTICE

To Property Owners in the Town of Acton

NOTICE OF APPLICATION to The Ontario Municipal Board by the Corporation of the Town of Acton for approval of a by-law to regulate land use passed pursuant to Section 30 of the Planning Act.

TAKE NOTICE that the Council of the Corporation of the Town of Acton intends to apply to the Ontario Municipal Board pursuant to the provisions of Section 30 of the Planning Act for approval of By-law 70-1470 passed on the 10th day of March 1970. A copy of the by-law is furnished herewith. A note giving an explanation of the purpose and effect of the by-law and stating the lands affected thereby is also furnished herewith.

ANY PERSON INTERESTED MAY, within fourteen (14) days after the date of this notice, send by registered mail or deliver to the Clerk of the Town of Acton notice of his objection to approval of the said by-law, together with a statement of the grounds of such objection.

ANY PERSON wishing to support the application for approval of the by-law may within fourteen (14) days after the date of this notice send by registered mail or deliver to the Clerk of the Town of Acton notice of his support of approval of the said by-law together with a request for notice of any hearing that may be held giving also the name and address to which such notice should be given.

THE ONTARIO MUNICIPAL BOARD may approve of the said by-law but before doing so it may appoint a time and place when any objection to the by-law will be considered. Notice of any hearing that may be held will be given only to persons who have filed an objection or notice of support and who have left with or delivered to the clerk undersigned, the address to which notice of hearing is to be sent.

THE LAST DATE FOR FILING OBJECTIONS will be May 6th, 1970.

DATED at the Town of Acton this 22nd day of April, 1970.

J. T. HURST
Clerk,
40 Mill Street East,
Acton, Ont.

EXPLANATORY NOTE

The general zoning by-law of the Town of Acton is being amended to restrict the height of apartment buildings to be constructed henceforth to a maximum of seventy (70) feet.

This amendment is necessary to clarify the ambiguity which currently exists and will relate only to property located in RM zones. (Residential zones fourth density).

THE CORPORATION OF THE TOWN OF ACTON

By-law No. 70-1470

A By-law to amend By-law 1358 as amended by By-laws 1416 and 1462

The Council of the Corporation of the Town of Acton enacts as follows:

- By-law Number 1358 as amended is hereby further amended by adding section 6.4.3.11 making the height for main buildings (maximum) seventy (70) feet.
- No part of this By-law shall come into force without the approval of the Ontario Municipal Board, but, subject to such approval, this By-law shall take effect from the passing thereof.

READ A FIRST and SECOND time this 10th day of March, 1970.

L. A. DUBY
Mayor

J. T. HURST
Clerk

READ A THIRD time and finally passed this 10th day of March 1970.

Vitamin C is essential

Hundreds of years ago, English sailors would set out from their native land on adventurous sea voyages that carried them around the world. In preparation for these long journeys, the ship's hold always contained a plentiful supply of limes.

Each day, every man was rationed one lime and that's how the English got the nickname of "limeys".

But there's more behind that story, say home economists from Macdonald Institute, University of Guelph. Although those sailors didn't realize it, the limes contained an invaluable source of vitamin C that was essential for their health.

Things haven't changed since then. We still need vitamin C to help resist infection, hold the body cells together, and heal wounds and broken bones. Because our body cannot store vitamin C, we need a fresh supply each day.

What we do know now is that vitamin C is found not only in limes, but in citrus fruit, tomatoes, strawberries, cantaloupe, green peppers, broccoli, cabbage, turnip and vitaminized juices.

MRS. BERT HINTON admires one of the lovely gowns created by Sheridan College fashion design students. Several creations were on display at the official opening of the Oakville campus of the college.—(Staff Photo)

According to a recent food survey, one individual eats during his lifetime, 30,000 eggs, 6,000 loaves of bread, 9,000 pounds of potatoes, 8,000 pounds of beef, 12 sheep, 15 pigs, 5 calves and 7,000 pounds of fish... so what difference can a few pieces of pie make?

CAMP FIRE

To prevent forest fire, build a camp fire only on rock, sand or bare soil where it is protected against the wind and where it cannot spread on grass or fallen leaves. Keep it small. Make sure it is out, drowned out, before breaking camp.

Inventor of radio was Canadian

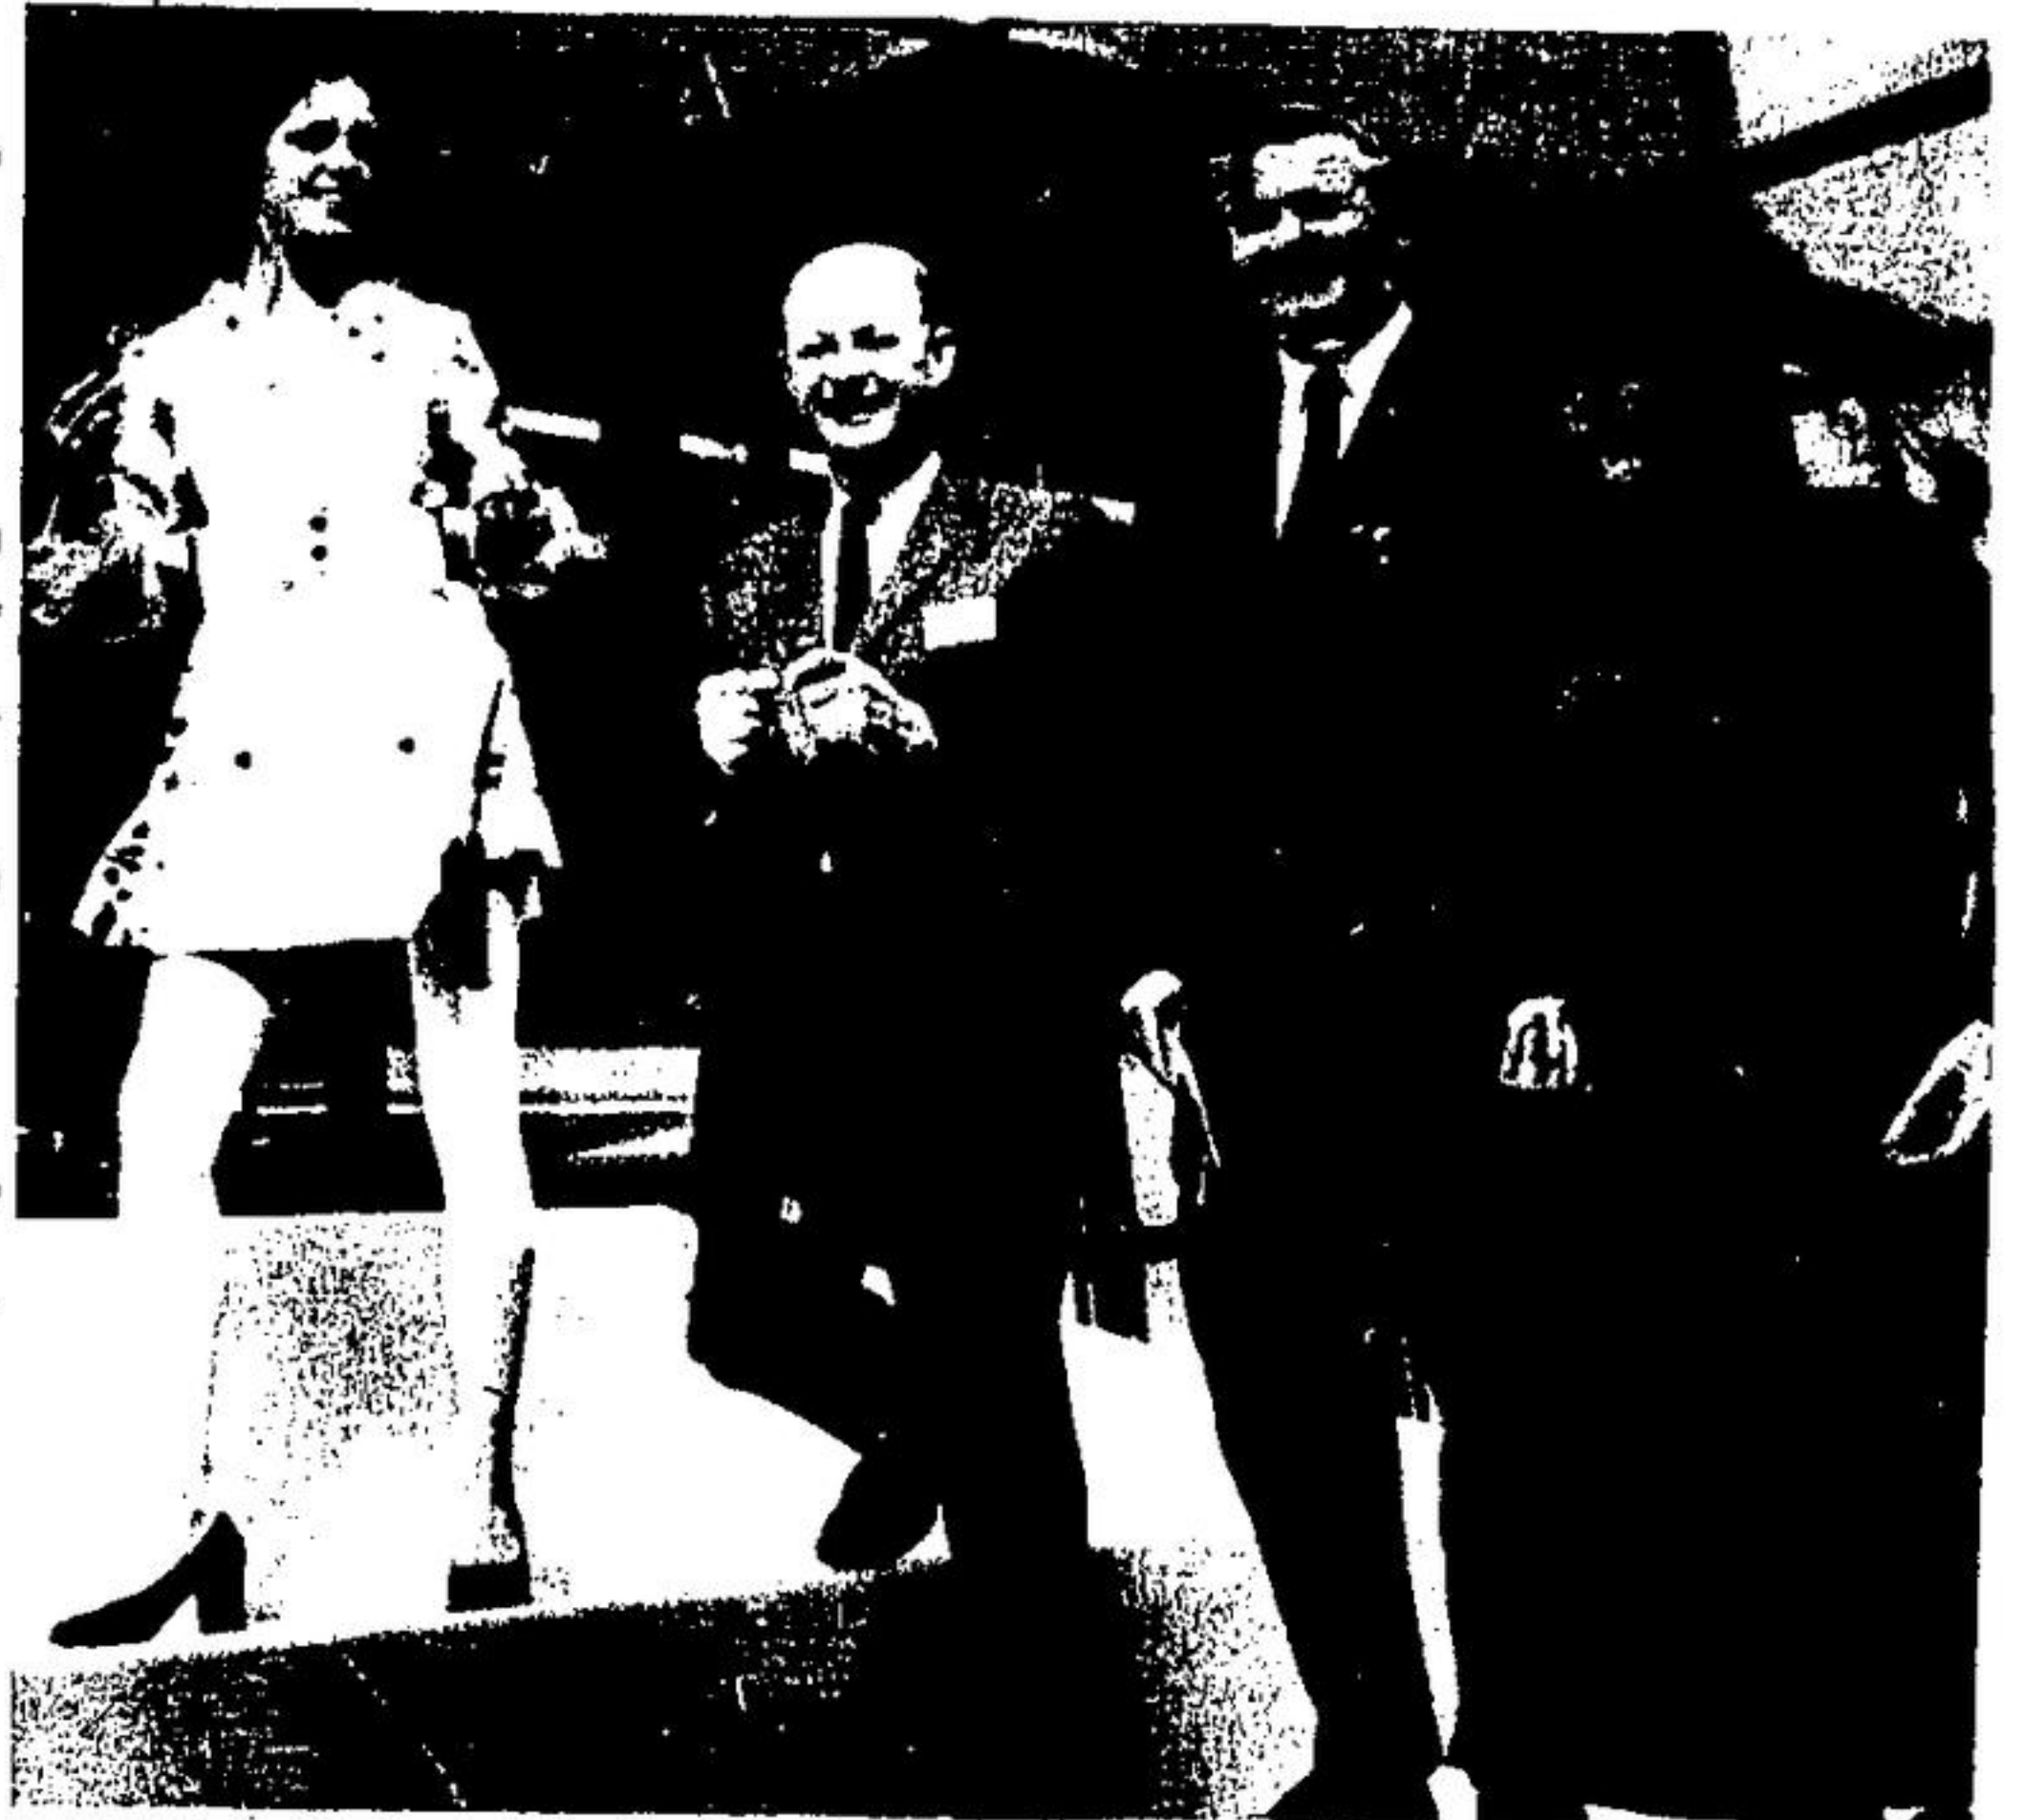

It wasn't Marconi who invented radio as we know it—it was Reginald Aubrey Fessenden, a Canadian. But the world—and Canada—has forgotten him.

Marconi believed that wireless transmissions could be used to transmit the dah-dit-dah of Morse code. Fessenden, working at about the same time in America, believed that radio waves could also carry voice, music and any other sound. And he proved it.

Sadly, a conspiracy of circumstances and vested interests prevented Fessenden from fully exploiting his own discoveries and while the world was changed by his inventions he made relatively little out of them before dying in Bermuda in 1932. He was still a Canadian.

The September Maclean's magazine tells how Ormond Raby, an Ontario real estate speculator, has tried, vainly to get Fessenden's achievements acknowledged by various levels of Canadian Government. Fessenden will not even be mentioned in the Hall of Communications at the new Ontario Centre of Science and Technology when it opens this September.

And yet, on his death, the New York Herald-Tribune said of Fessenden: "It sometimes happens, even in science, that one man can be right against the world. Professor Fessenden was that man. His ideas slowly supplanted those of Marconi, with all too little credit to the man who had been right."

MINISTER OF EDUCATION William Davis and past chairman of the board of directors John Ronson took time out from a busy schedule to pose with two of the lovely fashion models at the official opening of the new Oakville campus of Sheridan College.—(Staff Photo)

\$40,000 sports complex slated for C.N.E.

A \$40,000 indoor sports training complex will be built at the Canadian National Exhibition, Minister of Education William G. Davis has announced.

The complex, to be paid for by the Education Department through the youth and recreation branch, will provide a highly functional portable track and field facility located in the South Industries Building at the C.N.E. The 210 metre track will be one of the largest indoor running tracks in North America.

The complex will provide training and meet facilities for shot, discus and pole vault events. It will be completed in time for the November opening of the track and field season.

The project was developed in co-operation with the Federal, Metropolitan Toronto and City

of Toronto governments and the agencies concerned with the administration of track and field and related physical recreation programs.

The complex will add needed indoor track and field facilities and provide both training and competitive facilities for thousands of students in the elementary, secondary and post secondary schools. It can also be used as a leadership development centre, providing instruction for coaches and officials.

Mr. Davis said the CNE project could be the first of similar projects in other areas of the province.

Today's nickle is a dollar with the taxes taken out. A few years ago that was the definition of a dime.

Sheridan students from all counties

Forty per cent of students registered in Sheridan College's first year technology and technician programs come from outside the counties of Peel and Halton, according to a report done by Jack Quistwater, master of chemistry at the college.

Figures were compiled from a study of student records.

First year technology programs, said Mr. Quistwater, have attracted a smaller proportion of out-of-county students than the technician (two-year) programs. He thought this may be due to the late adoption of the co-operative program and consequent difficulties in letting people know it was being offered.

The co-operative program is a system similar to that at Waterloo University, where students alternate regular work periods of several months with classroom work.
