Snow's resolution sparks provincial legislation

Darcy McKeough announced that tion," Mr. McKeough told the the Ontario Government will annual convention of the Ontario implement uniform building Municipal Association in Ottawa standards in the Province "as Monday. soon as possible."

He said "the efficiencies implicit in a system of uniform building and fire safety standards should alleviate some of the serious housing problems that we have been facing."

"We know that it does not present the only solution to the housing crisis, but it is another

Municipal Affairs Minister decisive step in the right direc-

"The subject of uniform building standards found its way to the floor of the Ontario Legislature in March, 1968, through a resolution by my colleague Jim Snow, M.P.P., for Halton East.

He actively urged the adoption by the province of the National

Building Code of Canada and the standardization of building, fire and safety regulations for all municipalities in Ontario. Mr. Snow's suggestions were sound and well-reasoned, based upon his practical experience and knowledge as a general contractor.

In fact, the esteem with which he is viewed by leaders in the construction field has since been acknowledged with his appointment by the Prime Minister to the Board of Directors of the

their resolution.

Ontario Housing Corporation," Mr. McKeough said.

The Government has decided to place the responsibility for organizing and operating uniform building standards with the Department of Labor. Department of Labor

Labor Minister Dalton Bales told the convention that his Department will appoint two review committees to work out the practicalities of implementing uniform building

standards. "One committee will be responsible for drafting appropriate legislation. It will examine existing legislation in Ontario and resolve any differences that exist between municipal building by-laws, provincial standards, The National Building Code and The National Fire Code.

Second committee "The second committee will be concerned with setting up the necessary organization for effective inspection of building standards, approval procedures, uniform interpretation and enforcement, and developing staff, training and education program."

Mr. Bales added that a great deal of detailed work has to be done before uniform standards can be introduced "and we will proceed with this as rapidly as

"We will need to test and discuss the programs these committees develop on both the public and private sectors to ensure that all possible difficulties are adequately resolved before legislation is implemented.

Mr. McKeough said the idea of a universal system of building standards has strong appeal and "would result in substantial efficiencies in the planning, design, administration and construction of buildings as well as in the processing and stocking of building materials."

In September, 1968, Mr. McKeough set up an advisory committee under the chairmanship of Mr. C. D. Carruthers, an engineering consultant, to explore the whole subject area.
