"It's the man about the wiring, ma'am."

It's true, living in any older home without up-to-date wiring just doesn't hold a candle to truly modern electrical living.

The changes that electrical modernization brings will brighten your life throughout every room in your home - for years to come. You'll have more outlets and switches where you want them, better performance from your appliances - and you can even add the year-round comfort of electric climate control.

And rewiring an older home needn't be complicated or expensive. The cost will probably be less than you imagine, and the Hydro Finance Plan makes it easy for you to budget.

For greater comfort and convenience - and an extra margin of safety, too - call your qualified Electrical Modernization contractor. Or ask your Hydro.
