Credit Valley Authority

Budget for camping area water, roads at Limehouse

Members of the Credit Valley Conservation Authority approved 1972 budget estimates of \$1,065,213 at their regular meeting on August 18, 1971. From this total amount, \$196,400 will be spent on

conservation areas for washroom building and gatehouse at Bel-fountain; camping area, water supply and roads at Limehouse; river improvements, pavilion, maintenance building and landscaping at Meadowvale;

washroom change house and beach at Monora; renovations to the staff building and pavilion improvements at Terra Cotta; general development at Orangeville and tree planting across the valley.

The budget also includes \$165,000 for acquisition of Niagara Escarpment Lands.

Flood Control projects will claim \$581,000 of the budget. These include Cooksville Creek, channel improvement, Mains Creek Diversion, Orangeville Reservoir, Waterfront Plan (Mississauga Sector), Orangeville Drainage project, floodline mapping from Forks of Credit to Orangeville, general channel improvements and acquisition of Credit Valley lands in Mississauga.

Based on an estimated 1971 assessment it should mean 1.04 mills on taxes of the 16 contributing municipalities for Conservation purposes.

O.P.P. report

Only one crash during week

While working 236 hours, officers of the Acton Detachment of the Ontario Provincial Police, patrolled 909 miles, during the reporting week of August 15 to August 22.

Officers investigated a total of 14 occurrences. Eight of these were of a minor nature. The remainder included one theft report, one break and enter, two liquor violations, one report of forgery and one impaired driver.

In spite of a number of calls to disturbances at local beverage rooms, there were only two charges laid for violations of the Liquor Control Act.

There was one reportable motor vehicle accident investigated during the reporting week. The collision resulted in property damage only. One of the drivers involved has been charged with 'following too close.'

A total of five charges and three warnings were issued for infractions of the Highway Traffic Act.

In court on Thursday, August 19 a local driver was fined \$200 for 'Careless Driving'. An out of town driver was ordered to pay a fine of \$203 for speeding.

Safety advice for older drivers!

As we get older, hearing and eyesight are less keen, judgment is slower and physical dexterity is weakened. Older drivers can compensate by being extra alert at the wheel... by keeping up-to-date on traffic laws and rules of defensive driving... by planning every trip, short or long, in advance... by avoiding heavily-

Susquatch is a legendary man-like monster who roams the wilds of British Columbia.

There are 64 million acres of privately-owned forest land in Canada.

Increase value

Department encourages stocking of farm ponds

Most farm ponds serve a number of purposes. They provide water for livestock, irrigation, spraying, and fire protection. J. P. Myslik, agricultural engineering specialist, Ontario Department of Agri-

culture and Food, Brampton, suggests that a relatively low investment can increase the recreational value of farm ponds by providing good fishing.

The most sought-after fish for ponds is the rainbow trout. Most spring-fed ponds and a few ponds fed by runoff alone are suitable for trout. Ponds with at least quarter acre of surface area are desirable, but smaller ponds can be used, provided they meet the temperature requirements.

Optimum temperatures. Pond temperatures at the surface may be as high as 80 degrees without causing any harm. However, the temperature at the bottom should never exceed 70 degrees. Temperatures of 66 degrees or slightly higher are optimum.

Another important requirement for a trout pond is an adequate supply of dissolved oxygen in the water. Generally, oxygen concentrations below five parts per million are unsatisfactory for trout rearing. Spring water is often deficient in dissolved oxygen, simply because it has not been exposed to air.

There can also be a problem in winter when the pond surface freezes. This hinders the movement of oxygen from the air into the water. Another problem could be aquatic plants. They are not harmful when alive but when dead, they decompose and use up oxygen from the water.

Good for stocking. Brook trout and rainbow trout are suitable for stocking farm ponds. The brook trout is a better

choice for small ponds, but the rainbow trout can withstand slightly higher water temperatures. However, if the pond is not suitable for trout, it is still possible to have fish. Bass are able to live in higher water temperatures and do quite well in water temperatures of 72 degrees or slightly higher. Also, bass will reproduce in a pond, while trout will not.

Local offices of the Ontario Department of Lands and Forests can supply additional information on stocking farm ponds.

Suggests emblem for Centennial

Councillor Earl Masales thinks Acton should have an emblem involving the letter "A", as a trademark for centennial year in 1973.

At last week's regular council meeting, Councillor Masales pointed out the city of Guelph now has an emblem moulded around the letter "G". He thought perhaps a contest could be held to attract ideas for the symbol.

Councillor Masales' idea? "Perhaps something attached to our 'A' with wings on it," he said.

The windiest place in Canada is not the corner of Portage and Main in Winnipeg, but Cape Hopes Advance in Northern Quebec.

Early morning chase

An Acton citizen reported seeing two men climbing over a fence into Beardmore and Co. property about 1.30 Tuesday morning. He alerted Constables Devine and Brown of the Acton detachment, who gave chase.

But in this instance the pursued eluded the pursuers and escaped into the gloom. The constables reconnoitered and found a parked car nearby which they kept under observation. Later a man came to the car but he had a good excuse for being there at the hour and he wasn't charged.

Tuesday morning a search in the grounds revealed a can full of worms and a flashlight near the small pond on the property.

Police figure the men were just doing some illegal fishing.

Canada has added two words to the weatherman's dictionary — chinook and blizzard.

FAT ALBERT

'Fat Albert' — the world's largest air transport — USAF's Lockheed C5A will fly in this year's Canadian International Air Show. The 2½-hour Show will take place over the Canadian National Exhibition waterfront in Toronto, September 3, 4, 5 and 6 at 1.30 p.m.

INCOME TAX FRANCHISE AVAILABLE

H & R Block is looking for a responsible individual capable of operating a volume tax business. Prior tax knowledge, while helpful, is not necessary. The Block franchise is compatible with most other service-oriented businesses. We furnish:

- TRAINING • SUPPLIES
- ADVERTISING

H & R BLOCK

America's Largest Tax Service with Over 4,000 offices

TO: H & R BLOCK 133 Woolwich St. Guelph

Please send me your brochure outlining the H & R Block Franchise Program. I understand there is no obligation on my part.
