#### Limehouse residents seek . . .

(Continued from Page 1) other undesirable results like noise and dust.

Mr. and Mrs. Peter Hoekstra live on County Road 20 on the western side of the railway bridge and although their children travel by bus to the Christian school in Georgetown, they're concerned about all children in the village area.

"It doesn't affect my children, but I don't want to see anyone's child get hurt," Mrs. Hoekstra

Mrs. Hoekstra feels the three hour ben proposal is a good one. "I realize the truckers have to make a living too," she said.

Neighbors of the Hoekstras, Mr. and Mrs. Ron Clow have five girls, four of whom walk to school each day, crossing the railway bridge in the process.

A 10 ton limit sign is posted at the bridge, but some trucks have been caught violating the law. "It makes me mad to see trucks going over that bridge.

Our children always have to stop and watch for them before they go across," Mrs. Clow said. Mr. Clow claims the proposal to widen the road through the

village was not a good one, because it would leave a lot of houses sitting right on the edge of "We would like the trucks right out of the village altogether,"

Mrs. Clow explained. "But if we can't have that we would like to get signs stating the hours of Club on Tuesday of last week. restriction."

"I'm very concerned about the group.

children, but I don't see how a thing like that could be policed. Three hours is also one third of our work day. It would mean our trucks wouldn't be able to go anywhere during those hours,"

Mr. Duff explains that his firm does not own the trucks.

"I can't presume to tell carriers where to take their loads," he said.

He thinks one solution to the problem would be the installation of sidewalks in the village.

"I can sympathize with the people, but every house that is ever built takes between 20 and 30 truckloads of material to build it," he pointed out.

Mr. Duff thinks the village residents should get together and come up with a proposal as a

## lan Downie is vice-principal

A visit to Acton high school two years ago impressed Ian Downle so much that when a vacancy occurred in the teaching staff he applied for the position.

"It is the most interesting school in the county," he told the Free Press this week as he assumed the position of viceprincipal at the Acton school. He cited the semester system, the friendly atmosphere as good reasons for his choice.

And Ian Downie has been around

Born and educated in England, he spent five years in India as a Lloyd's agent, part-time Danish consul, exporting tea, as a steamship, airline and insurance agent as well as working for Standard Oil. The place?-Cochin, a seaport in southwestern

Emigrates here

He returned to England to work with an iron and steel company before deciding to emigrate to Canada. His first job in this country was at the Montreal docks as a checker ("I've had a checkered career") and from there he went into accounting with the Shell Oil Co. To update his qualifications he took a night course at Sir George Williams University.

It was while he was at the university that he approached the guidance department to see if he was headed in the right direction.

Uh-uh, the guidance professor sald after a series of tests. You would be much better as a
