Bridge distance It was all there, the

nostalgia, the hand shaking, and loud gusts of laughter as recall after recall revived relationships of the post. Guests attended from many parts of southern Ontario evidence that family scattering is not just a matter of today's time but has always been there. Ridgetown, Waterloo, Oshawa, Weston, Ancaster, Rexdale, Thornbury, Moaford, Palmerston, Arisa and Glen Williams, are names of districts and villages representative of only a few of the Sunday gatherers. One lady had come from Victoria, B.C. and was happy to have bridged the distance to meet up with old school chums.

The 100th centennial celebration of the school which was built in 1873 was conceived and conducted by the Rockalong Women's Institute and for months the ladies, with special committees had planned, pondered over school lists, and attempted to contact any student who had attended from 1900 on and prior to its official closing in 1965 when consolidation reared its questionably ugly head and the local rural school houses were closed down.

History of township schools in the early 1800's indicate a high level of educational interest and, as Eramosa Township became more settled, many private schools held in homes throughout the township.

Township divided Gradually, it is recorded, the township was divided into lines, No. 1, No. 2 etc. and schools were built one on the 1st line, one on the 2nd line and another known as Central School House on the 4th line which was chose as a place for all township meetings. These private schools were built and operated through community effort.

As population advanced gradually more schools went into operation, including the

GREAT

students of the old SS No. 8 on the back. The "what are up scrutiny on cohorts they schoolhouse in Eramosa you doing now, Charlie's" to hadn't seen since their 1900 more advanced seat of gathered to celebrate its 1973 the "I've been looking for school days to sophisticated learning, the local village went through the records of school and the second seat of learning, the local village went through the records of school and seat of learning. school S.S No. 9 and, in 1873, the S.S. No. 8, where many community gatherings, social tens, literary meetings, and singing classes, were held as well as presentations and Black. other important functions. It was also a meeting place of the Women's Institute, and, since its closing to become a community-owned community centre it has been a home ground for the Rockalong Women's Institute meetings with regular cuchre parties held there. ALBERT SHULTIS, oldest gentleman at the No. 8 Centennial Reunion, is flanked by two of its youngest, Phyllis Bayne and Leslie Nelson at the reunion.

MRS. GEORGE BAYNE of Guelph Street, Rockwood, was the lady chosen to cut the centennial cake for No. 8 school in Framosa as over 200 guests gathered to celebrate its 100 years from 1873 to 1973. The cake was baked and decorated by Mrs. John Thomson of R.R. 1, Rockwood.

# **Grand rivers** low this year

The Grand River Conservation Authority reports that river flows throughout the watershed are substantially lower than normal this year.

"If we didn't have the reservoirs to augment the natural flow, the Grand River would be little more than a mud flat in many areas," says Ilmar Kao, Authority assistant general manager.

In the Brantford area for instance, less than one third of the water in the river is natural. The rest comes from reserves which are being slowly let out of the reservoirs to keep the flow up to an acceptable level.

The shortage of natural water stems from below average rainfall this summer. In most parts of the watershed, precipitation has been as much as two inches below normal.

The Speed River, which runs through Guelph and meets the Grand at Cambridge (Preston), is at a very low level. When the Guelph

GUARDIAN DRUGS

SPECIALS

dam (on the Speed north of Guelph) is completed in 1976 the authority will be able to control similar situations in future dry years.

It is estimated the present flow in the Speed could be more than doubled if the Guelph dam were now in operation. "It sometimes puzzles

people that we let water out of the reservoirs during the summer," says Mr. Kao. While we recognize the fact that people would rather go boating and swimming in full reservoirs we also have to remember that the main purpose of our dams are flood and pollution control and that recreation is an added

There is little danger of the reservoirs going dry. With about 40 per cent capacity left Mr. Kao estimates there is enough water to maintain the river at it's present level for another 40 days.

In the meantime, Mr. Kao says "we need some rain."

# "TO THE CITIZENS OF NORTH HALTON"

In my quest for the Mayor's seat of North Halton I have had many opportunities to discuss the pros and cons about the formation of Regional Government for North Halton and what will be required. I cannot make a lot of wild political promises to salve the feelings of those who sincerely believe they have been neglected in both services and administration.

I can promise you that your tax dollar will be wisely and sensibly spent and that you will receive value for that dollar.

There are many areas encompassed by the new council that require immediate attention and there are a few practices we can well do without.

I do not profess to have all the answers with a be all that ends all attitude but believe in participation by all groups, be they service clubs, committees of council or private citizens.

#### WE DO NOT NEED

Dusty unpaved roads, closed meetings and lack of interest and support in recreation—this creates suspicion, mistrust and an apathetic attitude which contributes nothing to the community.

#### WE DO NEED

Wide open discussion with integrity and the knowledge of what is happening in the community through good press coverage. Pre-discussion can speed up administration with all members present, it also speeds up decisions and hasty decisions can take many deadly forms when all members do not participate.

For information call 877-5166 877-4175
