# 75% of free trees to go out on request

Halton Hills works committee decided last Wednesday that 25 per cent of the new trees the town buys will be used on certain arterial streets and the other 75 per cent will be given out to residents on request.

Which streets will receive trees has not been decided but they will be streets which aren't slated for construction work over the next few years.

"I wouldn't want them to go on streets, like Sargent Road, which are scheduled for work in the future," cautioned Councillor Len Cox.

The committee thought it would be a good idea to put some of the trees all down one street. "There is nothing nicer than a whole street of trees, like Charles Street," Cox noted residents really value the trees they get from the town and take good care of them.

Morris informed the committee since the plan to give out free trees to residents, for their boulevards was announced earlier in February, the town has had more requests for trees than they could possibly fill this year. The people who are left out of this year's tree planting program will have their names put at the top of next year's list.

The gas dryer. But not all fabrics are created equal. And therefore, shouldn't be treated the same. So today's natural gas dryers give you a choice; a setting for permanent press, and even an automatic setting that doesn't shut off until your clothes are completely dry (special sensors measure the moisture). Natural gas dryers come with lint screen, vent on the side, or vent on the back, electric ignition spark or continuous pilot. All come in the latest colours, and the latest styles. And operate for just pennies per load.

You see, natural gas is efficient. There's no refining or generating involved, you're getting fuel energy right from its source. Now that's a wise and efficient use of energy.

When it comes time for a new dryer, order a natural gas dryer. And get an order of dry clothes to go.

## FOR 1975, VOLVO DIDN'T ENGINEER A BETTER NAME. VOLVO ENGINEERED A BETTER CAR.

Every year, the Volvo 140 series, has gotten progressively better. Improvements for 1975 include:

- fuel injection, steel-belted radials,
- rack-and-pinion steering, a new front suspension,
- electronic ignition, front side window defrosters, an improved transmission and rear end, tachometer, a better looking front end and more comfortable bucket seats.

Plus, the 140 series now becomes the 240 series. It's a logical progression.
