## Exciting Console 4-Channel Sound with two remote speaker systems

The ALLEMANDE • F946AE

Country French styled console with full, contoured base, castors. Matching twin Allegro speaker cabinets. All three units feature simulated wood panels with the look of fine carving, accented by brass finished metal inserts over richly pleated fabric. Main console has center lift lid. Top and ends of each unit are genuine wood veneers finished in Antique Oak with base of matching solid hardwood solids. Decorative front and back of matching simulated wood materials. Cabinet size: Main unit: 31 1/2" H, 54" W, 19 1/2" D. Add 11" to depth for hinges. Speaker units: 24 1/2" H, 18" W, 14 1/2" D.

### with four built-in speaker systems

The CABRILLO • F941

Early American creole style console. Full flaring base, castors. Center lift lid. Decorative front features raised paneling of richly grained simulated wood material accented with textured fabric and massed brass finished hardware. Top and ends of genuine wood veneers finished in Dark Oak (F941B) or Pecan (F941P). Top rail and base of solid hardwood solids. Cabinet size: 28 1/2" H, 59 1/2" W, 19 1/2" D. Add 11" to depth for hinges.

The PORTSMOUTH • F942M

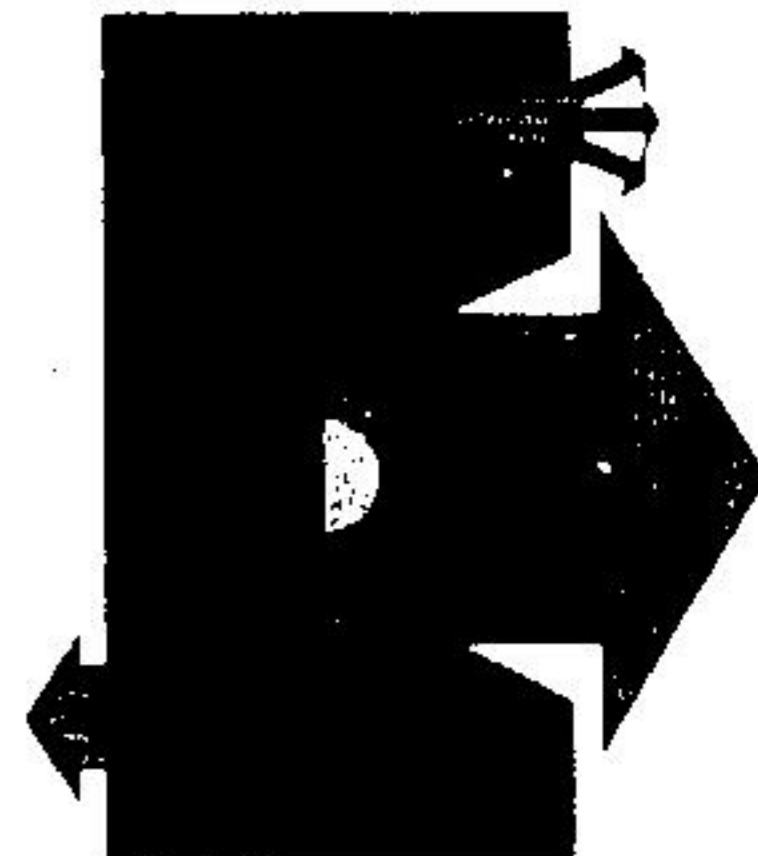

Early American creole style console. Full base with traditional bracket foot design, castors. Wrap around gallery, broad overhanging top, center lift lid and two ornamental drawers and center panels with authentically styled period hardware. Castor half turned columns over textured fabric. Top and ends of genuine Maple veneers and solid hardwood solids. Gallery and front of simulated wood material. Top rail and base of matching solid hardwood solids. Cabinet size: 29 1/2" H, 59 1/2" W, 18 1/2" D. Add 11" to depth for hinges.

Maple (F942M), Pecan (F942P) and Dark Oak (F942D) finishes available. For more information, please contact your nearest Zenith Audio store. Zenith Audio is a leader in the field of 4 channel stereo systems.

### 4 CHANNEL SOUND

In 4 channel, four separate sound sources are recorded onto four separate tracks (in the case of discrete tapes) and reproduced through four separate amplifier and speaker systems. On 4 channel matrix records, the four separate sound sources are electronically encoded into two channels. Then decoded when played and reproduced through the four separate amplifier and speaker systems. In this manner, 4 channel sound reproduction is more representative of the original performance, and is particularly effective in reproducing special electronically processed recordings. 4 channel is a significant step forward from conventional 2 channel stereo sound reproduction.

Featuring the deep, rich sound of Zenith's exclusive **Allegro** speaker system...

A specially designed lined panel, only the rear of the cabinet, is cut in a low bass trap by hole. The resulting front face of the panel and the cut out in the cabinet by the specially designed wood cut out panel. This panel is designed to absorb the low frequency sound waves. A built-in wooden compartment, this wood is top grade, high frequency, all the way up to 10,000 Hz. A specially designed speaker cabinet is cut in the rear of the panel, this is the primary sound, located high in the cabinet. A wooden cabinet is cut in the rear of the panel, this is the secondary sound, which is cut in the rear of the panel.

### MICRO TOUCH TONE ARM

Features a hand touch with a tracking arm that stays in place on a record's groove. With a hand touch, you can control the volume of your records, and the speed of your records, and the tone of your records. The Micro Touch Tone Arm is a new way to control your records, and it's the only way to control your records.

### MODULAR 4-CHANNEL ADAPTER (E9029W)

This device allows you to play 4 channel records on a 2 channel system.

### EXTENSION SPEAKERS AND STEREO HEADPHONES

Available for all Zenith 4 channel systems.
