Fashion and beauty '76

by Marilyn Ottaway

Last week there was an epidemic in our town. Maybe it even affected your house.

It's a disease of the mind that provokes one to go outdoors without a winter coat and to tiptoe through slush and water in thin-soled shoes. It gives one a feeling of well-being that is usually followed by a miserable head cold. But during the first stages sufferers are usually heard singing and whistling or at the very least humming.

They appear to smile more frequently and are often found outdoors for no apparent reason. These attacks are uncontrollable. It is what is commonly referred to as "spring fever".

This is an excellent opportunity to examine your spring wardrobe.

Operation analysis
If you have a suit, jacket, or coat that is good for you in terms of color and style, start to build and freshen up your wardrobe working from these pieces or any one of them.

enables you to mix and match almost any pieces in your wardrobe and ensures you of a co-ordinated look at all times.

Error?
If you made an error last year and chose something that is not becoming to you, discard it. Don't compound the error by trying to build on a mistake. You'll only waste more money.

If you find yourself starting from scratch as it were, choose a two-piece suit with classic style jacket and build

from there.

A skirt suit is probably the wisest investment for spring in '76, regardless of your life style, because this year's skirt is designed to be worn instead of pants. It's comfortable to move in with its below-the-knee length. It will be seen everywhere with every kind of top from sport shirts to light sweaters and classic jackets.

It's a must in every woman's wardrobe.

Pants remain unchanged in any drastic way, but skirts are definitely longer. At least one half-inch below the knee.

A new skirt and matching shirt might be a good investment at this time. Choose two colors that co-ordinate well, one of which should be an earth or basic color. With all new purchases, keep your two color choices in mind. This
