Anyone looking for babysitting jobs?

Judy McLin of the Community Services Centre is finding that quite a few people are calling her asking if she can put them in touch with babysitters. She has no list of young people available, but would be glad to pass on names for anyone who would like to babysit.

She points out the parents would have to get in touch with the person named themselves before engaging him or her. Mrs. McLin will merely pass on names. "No recommendations."

She would also like to hear from any young people who have nothing much to do this summer.

Others could also call her if they have suggestions for jobs for these young people, and Mrs. McLin will try to put two and two together.

For this kind of project, she has in mind boys and girls too young to get regular full-time jobs, but certainly old enough to be a good help to somebody—in their early teens, for instance.

In past years the town has had the service of a group of young people funded by an Opportunities for Youth grant. They helped older people with shopping, gardening, cleaning etc. Perhaps something like this could be set up, with the matter of pay to be figured out later.

Mrs. McLin would like anyone with names or ideas to give her a ring at the Community Services Centre 853-3310.

IS YOUR GAS RANGE AS UP-TO-DATE AS YOUR PHONE?

Once upon a time that crazy lookin' stand-up phone was considered by many to be "the bee's knees." (Yes kids, they really spoke like that, way back when.)

But today the telephone has evolved into an extremely sophisticated piece of communication machinery. Precise circuitry. Bold, futuristic design. The phone's really come a long way.

The same is true of gas ranges. Really.

Why today you can get modern gas ranges that have smokeless/odorless broiling, continuous cleaning ovens, micro-ray broilers, self-timing ovens, burners with infinite heat settings and more.

Ready? Here goes: some models come with eye level ovens, warming shelves, rotisseries, and your choice of decorator colours.

Bet you didn't know we had all those incredible features.

Modern gas appliances. Superbly designed to run at optimum efficiency. That saves you natural gas.

And that saves you money. Visit your Union Gas showroom or local gas appliance dealer today and see the efficient new gas ranges.

They're really worth looking into. (Whoops. We've got to go. The phone's ringing.)
