

Halton County Radial Railway

Ontario Electric Railway Historical Association, which operates the "Halton County Radial Railway", on the Guelph Line, was formed in 1953 to preserve electric railway equipment. This property was purchased and a long task of rebuilding a track was commenced. In 1972 the Museum was officially opened to the public.

The people working and operating the Museum are unpaid volunteers. Some income is derived from membership fees, donations from individuals and industry and from fares.
