75-in-1 Electronics Project Kit

Reg. 26.95

18⁹⁵

- Exciting introduction to space age electronics that's fun for people of all ages
- Build communications projects, computer circuits, radio, oscillators, telegraph and more. No soldering.

Science Fair Kits shown on opposite page

A Motor Generator Kit. Make a reversible tripolar motor. 28-194 9.95

B Junior Astronomy Kit. Build a power refractor telescope with 6-element lens. 28-195 10.95

C Solar Power Kit. 25 projects. For beginners, hobbyists — everyone! 28-246 14.95

D 20-in-1 Modular Lab Kit. Easy to build working projects. 28-245 16.95

E 150-in-1 Electronic Project Kit. And they all Really Work! 28-248 36.95

F Aircraft Monitor. Spring-clips make wiring a snap. Requires 9 volt cell. 28-244 12.95

G Electronic 'Song Bird' Kit. The singing picture that will surprise your friends. 28-239 11.95

H Photographic Experiment Kit. Build a 35 mm reflex camera. 28-198 24.95

I Aeronautical Lab Kit. Learn the "hows and whys" of air currents. 28-196 16.95

J 40-in-1 Electro Magnetic Project Kit. Each project battery powered. 100% safe. 28-252 23.95

K 10-in-1 Junior Electronic Lab Kit. Build a home radio station. 28-225 11.95

L 8-Transistor AM Pocket Portable. Music sounds better on a radio you've built. 28-222 12.95

M A fun way to build worldwide 4-Band Radio. 28-205 36.95

N 280-in-1 Complete Physics Lab Kit. A treasure chest of fun. 28-193 19.95

O Electronic 40 Research Lab Kit. Over 40 projects, over 100 components. 28-197 14.95

P Digital Electronic Computer Kit. Program it like the real ones! 28-199 26.95
