

# THEATER AT HOME! YES!

The Electrohome/Advent 750 Projection TV powered by Electrohome's fabulous ElectroBeam chassis will give you a vividly clear 6-foot color picture.

The life-size color picture right in your own home, will make any good program — from a brand-new color spectacular to the hundredth re-run of an "old favorite" much more real and absorbing to watch.

On your giant screen, things you've barely seen or completely missed on a standard TV set will be breathtaking. The best that television has to offer involves you as never before.

No matter what it is or where it is, you'll have the best seat possible. Your own most comfortable chair will be "front row centre" for you at the Academy Awards, or put

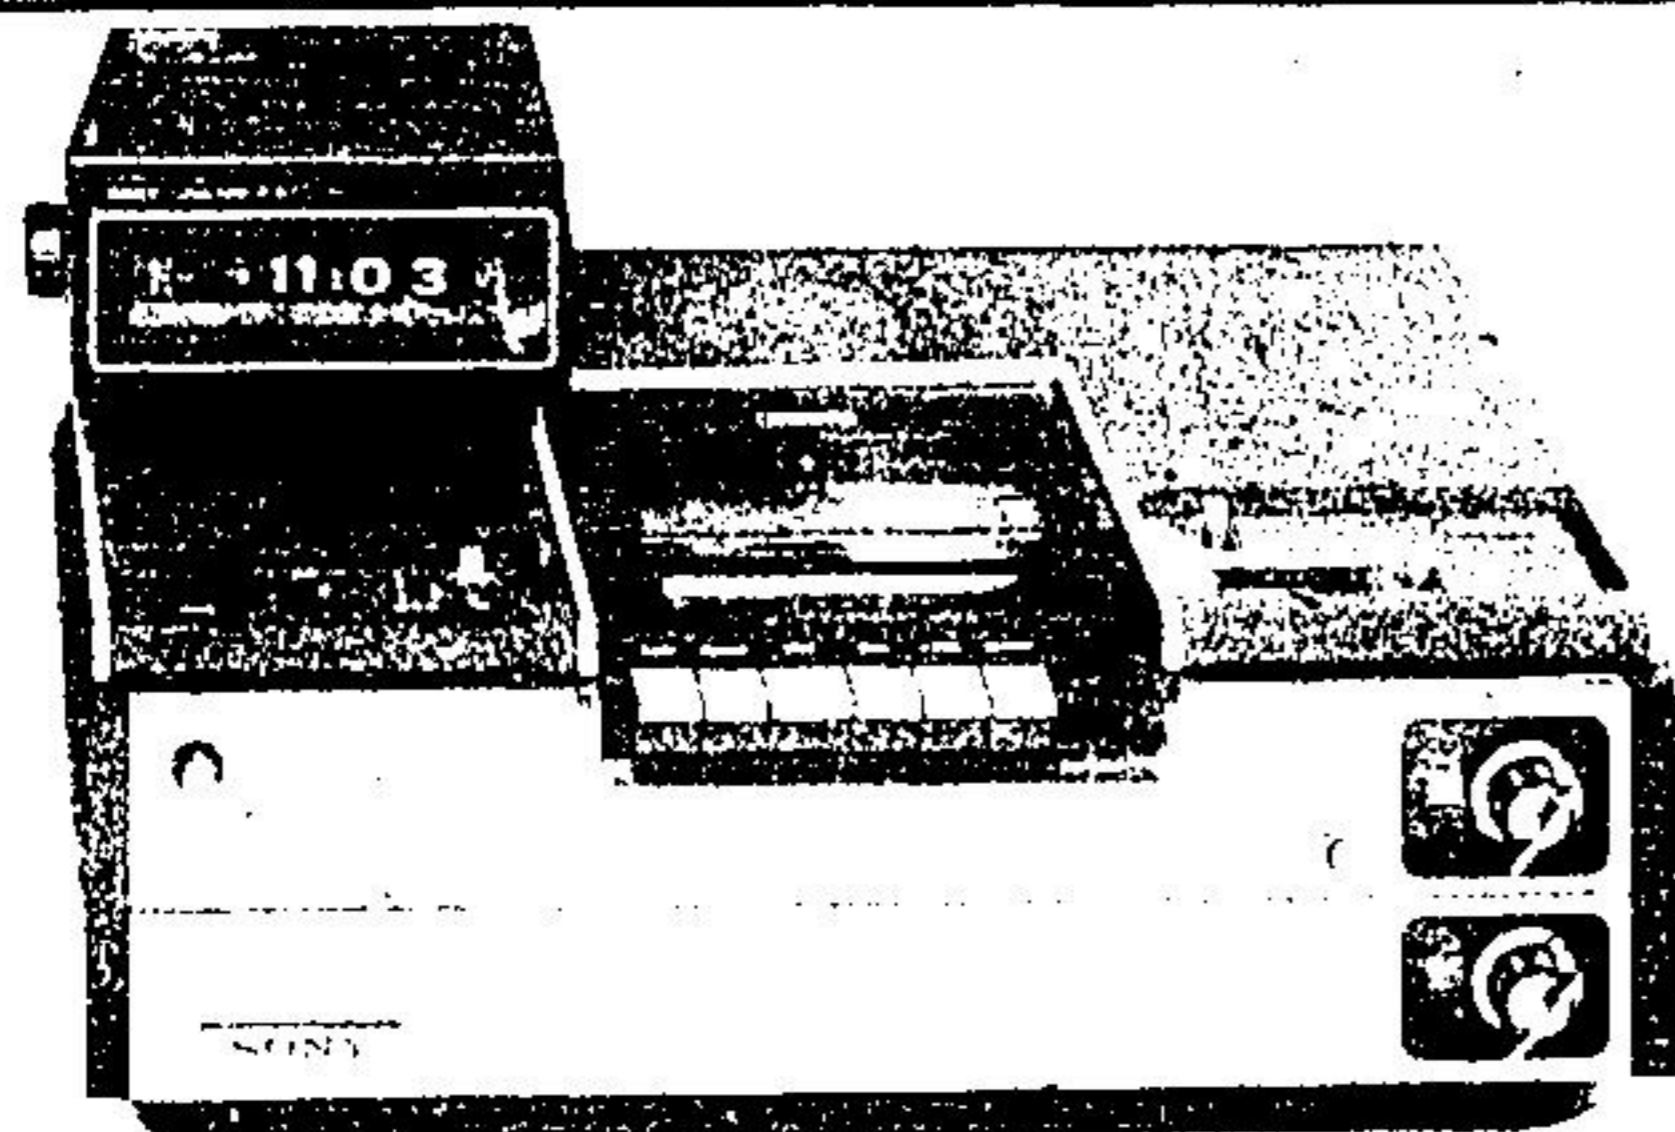

you on the 50 yard line for the Grey Cup or centre ice during the Stanley Cup play-offs.

Remember, the heart of this incredible new system is the ElectroBeam Chassis — designed and built right here in Canada by Electrohome. So, by doing what you do best — selling Electrohome color you can participate in this exciting program. **COLOR YOUR WORLD ELECTROHOME.**

## SEE WHAT YOU'VE BEEN MISSING

The Betamax™ Videocassette Recorder may be connected to your TV receiver, allowing you to record and playback programs whenever it is convenient (on your schedule, in your own good time).

It means that now you can record the program you are watching (or any part of a program); watch one program while you record another; or, with our Betamax Clock Watcher digital clock timer, even record while you are away from home.

And the new 1/2" videotape format developed by Sony offers maximum tape economy,

efficiency and picture quality in an easy-to-handle, easy-to-store cassette format. Each cassette is also re-useable (so you can re-record over and over again using the same tape).

The Betamax Videocassette Recorder will make a significant difference in your TV viewing enjoyment... because now you can program your own television. And call your television your own.

Look at what you've been missing. See a demonstration of the Betamax Videocassette Recorder. Now at Ava Brampton.
