Christmas.

by Fire Prevention Officer Larry Brassard

Cheerful lights of Christ- not brittle. mas bring a special warmth to the holiday season, but each year tradgedy strikes somewhere through electrical fires or other accidents. The main reason is either worn or defective equipment or sheer carelessness.

Christmas lights and electrically-lit decorations are tested and certified by the C.S.A. for safety. However, people often forget the most basic rules when handling electrical equipment. Fire safety precautions should head the list of every sensible family's precautions for Christmas.

There is no place like home for the holidays-there is also no place like home for Christmas fire hazards. We at the Halton Hills Fire

Department would like to give you just a few hints to make your holiday a safer

Three steps to safe enjoyment of a natural tree: -Don't purchase a tree that

New position for fire department

Georgetown native, is the first Fire Prevention Officer for Halton Hills.

Mr. Brassard started his job December 14 after being hired by Council. He has served on the Georgetown volunteer fire department for one year before applying for the new opening.

In his job, Mr. Brassard will be working in both Acton

and Georgetown, although he will be based in Georgetown He will be attending some fires to help find out how the blaze started, and will be doing home and business fire inspections as well as talking to various groups and schools

on fire prevention. Mr. Brassard has taken a fire prevention course in Milton put on by the Halton Region Fire Prevention

Weed guide available

Ontario weeds, a new publication available from the Ontario Ministry of Agriculture and Food will help anyone, from farmer to home gardener, to identify easily 270 of the most common weeds in Ontario.

The publication, released in November, includes with the description 195 drawings and 53 color photographs.

Dr. J. F. Alex, co-author of the publication and member of the faculty of the Ontario Agricultural College (OAC) in Guelph, said that although the book is primarily aimed at farmers it will be useful to a number of other people. He said the book would be a

valuable aid to agricultural representatives, weed inagricultural spectators. colleges, schools, naturalists and gardeners.

"What the book will give you is the name, habitat, locality and description of the plant in layman's language, an illustration and characteristics of a particular weed," said Dr. Alex.

Special features of the publication include eight pages of color photographs, enlargements of drawings identifying characteristics features, and names of weeds in both English and French.

"There are basically two ways to use this book," said Dr. Alex. "People will be able to thumb through the book looking at illustrations to identify a weed or use the identification key."

Dr. Alex explained that the identification key uses features of the plant such as the type of stem, leaf, flower and root system to identify the

"The whole idea of the book is to make it easy to identify weeds," he said. "This will cut down the need for specialists to go out to farms to iden-

tify weeds." Used in conjunction with Publication 75, Guide to Chemical Weed Control, Ontario Weeds will enable farmers to get the most effective weed control.

Ontario Weeds has been prepared by members of the OAC faculty periodically since 1891.

The new version, prepared by Dr. Alex and C. M. Switzer, Dean of the OAC, is a complete revision of the 1967 publication.

The publication is now available from Information Branch, Ontario Ministry of Agriculture and Food, Legislative Buildings, Toronto M7A 1A5.

Payment of \$2.50 must accompany orders for Ontario Weeds, publication 505. Cheques should be made payable to the Treasurer of

Electrical tools are either double insulated or provided with three-prong grounding type attachment plug. Never break ground pin off.

TOSSING THE RING IS 4-year-old Mike Brook during Beardmore's annual Christmas party for employees and staff. Holding Mike is his dad Ken while concessionnaire Joe DePieri watches. Many families attended.

Pet of the week

MISTY, A FIVE-month-old West Highland terrier, has one problem, say her owners Tracey and Brian Patterson. She thinks the green shag carpet in the living room is grass. Misty also has a stubborn side as she will not eat any dog food in the morning until she has had her toast. She likes to eat flowers as well.

Glad holiday wishes by the stockingful are coming your way. May the season bring you love and joy in full measure.

Collision at intersection

Police estimate about \$1,300 in damage occurred to two vehicles involved in a collision at the intersection of Highway 25 and Milton-Halton Hills Town Line at 3.25 p.m. Saturday.

George Youngson of Acton was northbound on Highway 25 in his 1973 Ford when a 1976 Toyota driven by Cynthia Barker of Milton tried to make a left turn at the inter-

The two cars collided but no one was injured in the acci-
