### 23-channel CBs will NOT become obsolete!

After April 1st, 1977, 40-channel CB sets will be licensed to sell in Canada. This will be a big break for avid CB collectors, who want to have the latest models available. BUT, it will not obsolete the present 23 channel CBs. In fact, it will mean less crowding on the existing 23 channels, since it will add 17 more selections. You CAN communicate with a 40 channel CB on your 23 compatible channels — the frequencies will not change. Channel 10 or 19 will continue to be the trucker's channel and channel 9 will still be recognized as the emergency channel. So buy 23 channels now, and 'think about' 40 channels for the future. At these prices, you can't lose!
