

## Separate garbage report urges

Halton Hills council should investigate the separate collection of paper, glass and metal in garbage pick-ups. They should also try to sell the materials, according to a report of a special committee, headed by Councillor Pat McKenzie.

The report also urged council to seek permission from the Ministry of Environment to allow the burning of leaves on private property, and said the dumping of wood at the disposal site by town employees should be restricted. Instead the report suggested the wood be stored elsewhere and made available free to citizens as an energy source.

It urged the dumping of garbage on roadsides in the town area should be discouraged, and the public invited to suggest ways of further reducing the amount of waste dumped each week in the the landfill site.

Councillor Russ Miller said he didn't want the subject to be dropped after the report is done. He urged further action to make sure something is done to implement it.

McKenzie said he hoped this study would tie in with other area studies.

## Howse articles displayed

Posters are up in town advertising Senior Citizens Week from June 19 to June 25.

Two Acton people who have a particular interest in the observance of Senior Citizens week are Del and Ed Howse, who operate Howse Studio at their home on Roseford Terrace. They have been asked to send articles to a special exhibition of crafts to be on display in Toronto. Fourteen pieces of their hand-painted ceramics are in the show. The art, craft, model and sculpture display will be in the art gallery in the Macdonald building and St. Lawrence Lounge at Queen's Park.

Mr. and Mrs. Howse are members of the Acton Arts and Crafts group and many people here have admired their handiwork.

Entertainment will be programmed for Monday, Wednesday, Thursday and Friday of Senior Citizens Week there. Mr. Howse was pleased to notice that one of the entertainers is to be Horace Lapp. They played together in a band in Toronto years ago.

## Beaveriee

Milton and North Halton District Beavers wound up the 1976-77 season with a Beaveriee at Milton fair grounds.

The Beaveriee was the first of its kind for the Beavers and Milton Assistant District Commissioner Lois Losole was pleased with the turnout.

Eight colonies, 150 boys, and between 35 and 50 supervisors participated in the day-long affair entitled, "Christmas with a Difference".

The five to eight-year-olds played games, sang songs, made crafts, decorated the Beaver Lodge and enjoyed a large lunch together.

Near the end of the day, Beavers made crafts as gifts to each other, as well as for themselves, to take home as a memory of the day.

The Boy Scouts of Canada organization will send each Beaver a Beaveriee patch as a memory of the event.

## Study parking

Halton Hills Parking Authority was asked by council to look into other areas in Acton to be used for off-street parking.

Mayor Tom Hill asked if the motion meant in addition to the site of Hotchen's bakery.

Councillor Peter Marks assured him it was. He said more parking was needed in the town.

## Hire planner at \$20,000

Brian J. Kropf was hired as assistant planner for the town, at Monday night's council meeting.

His salary will be \$18,784 plus the seven percent raise, just authorized for salaried employees. This brings the salary to \$20,000.

Mr. Kropf replaces Ron Burnett, who resigned in April.

# Halton-Burlington

### UNNECESSARY ELECTION

The fact is, that this \$20 million election should not have been called. Minority Government was working well and 105 Bills passed in the last session of the Legislature. The Conservatives, by calling this election, have shown they are more concerned with power than with good government.

### GOVERNMENT SPENDING

The Davis Government has been on a spending spree — With Your Money! There has not been a balanced budget since the Robarts era. Interest alone on the Provincial debt is \$3 million per day — over \$1 billion per year! No wonder Hydro rates, OHIP premiums, Tuition fees, and Go Transit fares have increased drastically. A Liberal Government will be prepared to get Provincial spending under control and in regard to its rates, taxes, and tuitions will live within exactly the same income restrictions that you do, during the anti-inflation controls, and in the post control period.

### REGIONAL GOVERNMENT

The Davis Government is committed to Regional Government. Only minority Government has slowed the implementation process. So much for local autonomy where decisions are made by people who understand the community! Under the Regional system a new level of costly bureaucracy has been created, and property taxes have increased by 105% in some areas versus an average of 41% in non-regional areas. A Liberal Government will consult the people and will dismantle Regional Government where it is their will.

### DEVELOPMENT CONTROLS

Government Agencies such as the Niagara Escarpment Commission, the Credit Valley Conservation Authority and Parkway Belt authority have created an overlay of bureaucracy which has placed a serious imposition on property owners. These agencies have often been arbitrary and subjective in their decisions. While the Liberal Party endorses the basic concepts of these agencies, it will ensure that the basic rights of private property owners are respected.

### PROPERTY TAX REFORM

A Liberal Government will not implement taxation on the basis of market value assessment. Such unfair assessment will drastically increase single family residential and farm taxes. The ten year taxation lien on agricultural land will not be implemented. Schools and charitable organizations will not be taxed.

### EDUCATION

The responsibility for the crisis in our education system lies not with the teachers or students, but with the Davis Government. A Liberal Government pledges to return to a system where ALL students are exposed to the basics of good education and where good teachers are paid the same as good administrators.

### UNEMPLOYMENT

At present there are 320,000 persons unemployed in Ontario, including 132,000 young people. Another 200,000 will enter the job market this year with no prospects. We cannot afford the loss of productivity and the demoralizing effect on our youth. A Liberal Government will create 100,000 new jobs per year, for the next three years, in the small business sector, by contributing up to \$2000 per year toward the salary for each new position created. The cost will be recovered through resulting additional Provincial income and sale taxes and a decline in unemployment and welfare expenditures.

### HYDRO CORRIDOR

Ontario Hydro wants to force the 500,000 volt Bruce Transmission Corridor through Halton's best farmland. Concerned land owners have asked the Government to order an independent study of Hydro's plans, and have agreed to be bound by its findings. The Davis Government stubbornly refuses the study and wants a majority Government to push the corridor through. Julian Reed has supported the landowners efforts since they began and a Liberal Government agrees that such a study should be ordered.

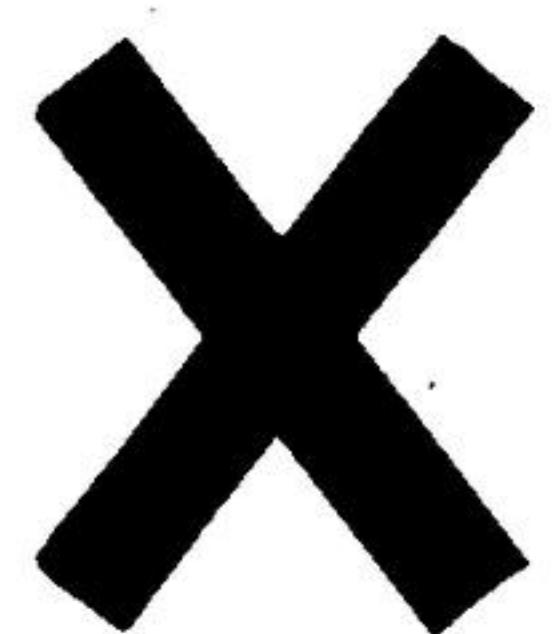

### HYDRO RATE INCREASES

Hydro rates have increased drastically. Present Hydro pricing structures create lower rates for higher consumption and result in the highest rates being charged to those who can't afford them. A Liberal Government will reverse the structure to promote conservation and will force Hydro to adopt better load management practices and encourage off peak power consumption to reduce the need for rate increases.

### WASTE DISPOSAL

A Liberal Government will bring 100% Solid Waste Recovery to Halton. The need for landfill sites such as Site "F" will be eliminated. The Liberals support continuation of the existing multisite concept on a short term basis only.
