Halton is 10th highest in injuries

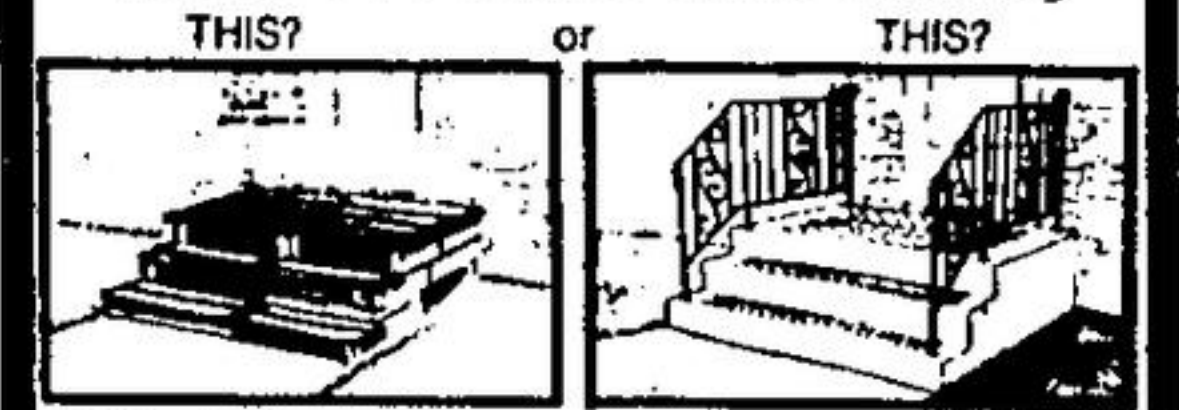

The region of Halton accounted for .03 per cent or 72 of the 1,936 farm-related injuries that occurred in Ontario in 1976.

Statistics recently released by the Farm Safety Association of Ontario reported that 11.7 per cent or 218 of the total 1,936 lost-time injuries in agriculture occurred in Haldimand-Norfolk County.

Larry Swinn, senior safety consultant for the Association said, "The main reason for the large number of injuries is the concentration of tobacco, fruit and vegetable operations in the county. These operations which employ large numbers of seasonal, unskilled workers have traditionally reported high numbers of agricultural injuries."

County ranked second in agricultural lost-time injuries. A total of 194 or 10 per cent of Ontario's agricultural injuries occurred in that county because of the intensity of horticultural landscape and fruit and vegetable operations.

Delay

Halton Board of Education will be asked Thursday to drop one of its objectives for this year. Mass testing of students in core-curriculum and school by school evaluation could be delayed.

Wednesday, the board received a report from the administration stating it would be very costly to achieve one of the objectives.

When the board came up with its list of aims and objectives for the next two years Trustee Don Long was successful in having "to evaluate the achievement of all students in the area of core curriculum and to summarize and report to the board these results by region and by school," added.

After hearing the report estimating the cost between \$296,060 and \$403,420, Trustee Judy Alexander said she would bring a motion to this week's meeting calling for the objective to be dropped.
