## Interchangeable Hanimex lenses

New Hanimex multilayer coated lenses are ideal automatic matchmates for Hanimex single lens reflex cameras, as well as many other brands. From 28mm wide angle through 400mm telephoto, and including an 80-200mm zoom, they represent the most advanced thinking in optical design — plus multilayer coating, to reduce internal reflection, glare and "ghosts" to a small fraction of non-coated types, and at the same time enhance contrast and spectral transmission. Look for the Hanimex "Green Circle" of quality ... your results will be worth it.
