by Salety Officer Lerry Brassard

Three people were burned, one seriously in two separate fires this past week in Halton Hills. Both fires were very similar and were not unlike several that the Halton Hills Fire Department responds to every month. The story is the same, the end result is the same, only the people change.

Each year grease fires cause thousands of dollars worth of damage to Canadian homes and painfully burn hundreds of Canadians. All of these fires and injuries can be prevented by just remembering that cooking oil is very dangerous and by following these safety hints:

1) NEVER overheat or leave cooking oil unattended.

2) NEVER risk carrying out a burning pan

3) NEVER throw water on grease fires. But if the grease in a pot or pan does catch fire:

1) Turn off heat 2) Smother the flame by covering the pan with a suitable

3) He cautious with special regard to loose fitting clothing which may easily eatch fire if you get too close.

If the fire has already spread when you discover it: 1) Get everyone out of the house

2) Close all doors on your way out, if this doesn't take extra 3) Call the fire department from a neighbor's house.

All three of the injuries mentioned earlier resulted when someone tried to carry the pot of grease outside. Did you ever cook bacon and get a spirt of grease on your arm? Try spilling a pot of boiling grease attover you!

Cooking french fries should not be taken lightly. It's one of the most dangerous things you can do. Never leave them unattended as this is now most grease fires start. It can be done safely if you follow the hints noted above.

It's up to you!
