

DRESSED AND READY to party at the recreation department's preschool play shop! Each Tuesday the playshop is run by Linda and

Flo Bowen. There is a class in the morning and one in the afternoon at St. Alban's Hall. Each class is a ten week session.

KIM HEAPS was a gypsy lady at the Guide and Brownie tea Saturday at the Scout Hall. She holds Tasha Peterson, who in turn holds a Brownie doll.

Laurie Pierce wins president's scholarship

Laurie Pierce, a former Acton student, has been awarded the prestigious Nipissing University College President's Scholarship. Laurie is a graduate of Acton High School and she is currently enrolled in the first year of Nipissing's Bachelor of Arts program.

Established in 1977, the President's Scholarships are designed to provide outstanding students from southern Ontario with the opportunity to study at a small university college in Northern Ontario.

To receive this scholarship, students must attain a minimum Year Five average of 80 per cent. Also, all candidates must be recommended by the principal or by the head of the school's guidance department.

In addition to meeting these academic requirements, students must also display an interest in the unique educational environment that is

available at Nipissing University College in North Bay. The university's small, personalized classes and beautiful 720 acre campus are special features for many students from southern Ontario.

The scholarships are of a value of \$1,500 each and are to cover the cost of the student's tuition and residence fees. Five students from Burlington, Bracebridge, Huntsville, London and Oakville were also awarded President's Scholarships.

Sensory laser plane is donated to school

Sheridan College's Heavy Equipment School in Milton is awaiting the arrival of a \$30,000 laser plane—a device that almost totally automates the work of survey crews.

The equipment is being donated to the school by a California company. Sheridan president Jack Porter told a Board of Governors meeting Wednesday that the device will be the second one in Canada.

An Ontario construction company has purchased and is currently using the device. The system was developed by

a company called Spectra Physics and uses sensory devices for grading roads and parking lots.

"It's a reflection of the stature the college has achieved when we are donated equipment such as this," said Porter.

The device eliminates the use of grading sticks and is accurate to within one-eight of an inch. Ken Yundt, an instructor at the Milton campus, said the laser plane will be mounted on a grader and used as a teaching aid.

KIM ARNOLD dressed up like a baby, complete with bonnet and diaper, to wait on tables at the Guide and Brownie tea and bake sale Saturday. Her customer is Cindy Dunn.

KRISTINE BRUCE, a leader of the Fourth Acton Pack, dressed up as a witch at the Guide and Brownie tea and bake sale Saturday.
